

METHOXYCHLOR MANEB NO. 57

ACTIVE INGREDIENTS

Methoxychlor, Technical	5.0
Maneb (Manganese ethylene bismethiocarbamate)	7.0
INERT INGREDIENTS	88.0
Total	100.0

Manufactured by The Dow Chemical Company, 1415 Michigan Ave., Detroit, Michigan 48207.

Recommended for control of various insect and fungus diseases on Cucurbits, Cucumbers, Melons, Squash, Tomatoes, Eggplant and Peppers.

DIRECTIONS

The following directions are furnished by us and believed to be reliable but no warranty is made. This dust should be applied at the rates suggested below, depending on the size and condition of the plants and the extent of application.

CUCUMBERS, MELONS, and SQUASH To control cucumber Beetles, Leafhoppers, Leaf Miner Worm, Flea beetle, Squash Vine Borer, Anthracnose, and very Mildew, apply dust at the rate of 30 to 40 lbs. per acre. Start application when insects first begin to form or when signs of insects or disease. Repeat applications at weekly intervals, the last only within 7 days of harvest.

USDA Reg. No. 595 239

Net Wt. 50 Lbs.

TOMATOES, EGGPLANT, and PEPPERS To control Flea Beetles, Colorado Potato Beetle, Leafhopper, Flea Beetle, Blister Beetles, Anthracnose, and Cercospora (leaf spot), apply dust at the rate of 30 to 40 lbs. per acre. First application for insects should be applied when plants are small before transplanting and repeated weekly as long as insects are troubling the field. For disease, first application should be made about 30 days after first planting, and repeated at 7 to 10 day intervals thereafter. Last application should be made within 7 days of harvest.
