

DICHLONE SULFUR DUST NO. 2-30

ACTIVE INGREDIENTS:

Dichlone (2,3-Dichloro-1, 4-naphthoquinone) 2.0,
Sulfur 30.0,

INERT INGREDIENTS: 68.0,
100.0,

Recommended for the control of fungus disease on apples, cherries, plums and peaches. This dust is compatible with the dry and wettable powders of Rotenone, Parathion, Arachite, Thiram, Ferbam, Captan and Zinb.

DIRECTIONS

The following directions are furnished by us and are believed to be reliable and of value. For further information consult your state experiment station for recommended dosages in your area.

APPLES: To control Apple Scab and Powdery Mildew, apply this dust at the rate of 45 to 60 lbs. per acre. Begin applications at the first sign of green tissues and repeat applications every 5 to 7 days up through the first cover spray (7 days after petal fall). Some browning of petals may occur, but this will not discourage bees or affect fruit set. Do not use this dust after first cover.

PEACHES, CHERRIES AND PLUMS: To control Peach Scab, Brown Rot and Leaf Spot, apply this dust at the rate of 45 to 60 lbs. per acre. Applications should begin at the pre-bloom stage and continue every 5 to 7 days through the bloom, petal fall and first four cover applications. Dust may be used every 3 to 4 days if rainy weather prevails. For Brown Rot and Leaf Spot, this dust may be used at weekly intervals to within 7 days of harvest on Peaches and to within 3 days of harvest on Cherries and Plums.

CAUTION: Keep Out of Reach of Children

May cause skin irritation. Avoid contact with skin. Avoid inhalation of dust. Wear protective clothing. Wash with soap and water after using and before eating or smoking. Avoid storage near feed or foodstuffs.

Toxic to fish. Keep out of any body of water. Do not contaminate water by cleaning of equipment, or disposal of wastes.

Apply only as specified on this label.

Sulfur may burn foliage when temperatures are exceedingly high.

Do not apply when weather conditions favor drift of dust in nearby areas treated.
