

ATRAZINE LINURON

For Selective Weed Control In Corn (Wettable Powder)

Active Ingredients:

Atrazine (2-chloro-4-ethylamino-6-isopropylamino-s triazine) ... 30.8%

Linuron [3-(3,4-dichlorophenyl)-1-methoxy 1-methylurea] ... 30.8%

Inert Ingredients: 38.4%

U.S. Patent No. 3,022,150

U.S.D.A. Reg. No. 595-268

CAUTION!

HARMFUL IF SWALLOWED. MAY IRRITATE EYES, NOSE, THROAT AND SKIN.

Avoid breathing dust or spray mist. Avoid contact with skin, eyes, and clothing. Avoid contamination of feed and foodstuffs.

Net Wt. 5 Lbs.

h

Use HAVILAND ATRAZINE LINURON WEED KILLER on corn fields to control weeds before and after corn emergence. It is a selective herbicide which kills weeds without injuring the corn. It is effective against many common weeds including annual grasses, broadleaf weeds, and sedges. It is also effective against some perennial weeds. It is safe for use on corn at any stage of growth from emergence to maturity. It is also safe for use on corn in the presence of other crops. It is also safe for use on corn in the presence of other crops. It is also safe for use on corn in the presence of other crops.

HAVILAND ATRAZINE LINURON WEED KILLER is a wettable powder which is applied to corn fields by hand or by machine. It is a selective herbicide which kills weeds without injuring the corn. It is effective against many common weeds including annual grasses, broadleaf weeds, and sedges. It is also effective against some perennial weeds. It is safe for use on corn at any stage of growth from emergence to maturity. It is also safe for use on corn in the presence of other crops. It is also safe for use on corn in the presence of other crops.

Make a uniform application of a band over the row broadcast spray application **before crop emerges**. For early and late corn planting, the spray should be applied as soon as possible. Apply at a rate of 25 to 40 gallons of water per acre. The amount of water used will depend on the soil type and the weather. The spray should be applied in a uniform band over the row. It is also safe for use on corn in the presence of other crops. It is also safe for use on corn in the presence of other crops. It is also safe for use on corn in the presence of other crops.

Soil Type*	Lbs. HAVILAND ATRAZINE LINURON WEED KILLER in 25 to 40 gallons water per acre (of ground actually sprayed)	Example: Band application rate for corn 14" apart in 42" row
Light sand	1.0	
Medium sand	1.5	
Heavy sand	2.0	
Light loam	2.5	
Medium loam	3.0	
Heavy loam	3.5	
Light clay	4.0	
Medium clay	4.5	
Heavy clay	5.0	

* Do not use on sand or loamy sand soils as crop injury may result.
