

HOW TO USE PURINA HORSE SPRAY CONCENTRATE
MIXING DIRECTIONS

HORSES—SPONGING—Mix 1 pint of Horse Spray Concentrate with sufficient water to make 1 gallon of mixed solution. Use a clean empty gallon bottle for convenience in mixing and storing diluted solution. Sponge mixed solution on portions of the hair coat in the region of the ears, neck, back (except under saddles), belly and legs. Apply one pint to one quart per animal, according to the size of the animal.

SPRAYING—Mix 1 quart of Horse Spray Concentrate with 9 quarts of water (2 1/4 gallons). Use a compressed air sprayer of 3 to 4 gallon capacity. Shake thoroughly before using. Spray the entire animal using enough to dampen the hair coat or wet the skin. Apply one pint to one quart per animal, according to the size of the animal.

USE DIRECTIONS

Stable Flies and Houseflies—Apply at weekly intervals or as necessary.

Horseflies and Deer Flies—Apply every 3 days or as necessary to give continued protection.

NOTE: Do not reuse empty container. Destroy when empty.

CAUTION: Harmful or fatal if swallowed. If swallowed, do not induce vomiting. Call physician immediately.

676C

D-4274

Printed in U.S.A.

Horn Flies, Mosquitoes, Gnats—Apply at two-week intervals or as necessary.

Lice—Apply so as to thoroughly wet the skin. Repeat after 10 days or as necessary.

For control of insects on horses.
