PURINA CHLORINE EGG RINSE

Purina Chlorine Egg Rinse is a dry chlorine concentrate for use in preparing a sanitizing rinse for washed eggs.

HOW TO USE:

Stock Solution: Add $\frac{1}{2}$ cup (8 tablespoonfuls) of Purina Chlorine Egg Rinse to 1 gallon of water and mix thoroughly.

Proportioners: Use a water proportioner which dilutes at the rate of one ounce per gallon and use *Stock Solution* as the additive. At this rate the eggs will be sanitized with 100 ppm available chlorine.

Sanitizing solutions should be slightly warmer than the eggs, but not to exceed 115° F. Ideally, the solution should be maintained at 105° F. to 115° F.

POISON

WARNING: Harmful if swallowed. May cause chemical burns. Do not allow contact with skin, mucous membranes, or clothing.

ANTIDOTE:

External—Flood with water for 15 minutes.

Internal—Drink large quantities of water or milk. Follow with Milk of Magnesia, vegetable oil, or beaten eggs. Call physician immediately.

Eyes—Wash eyes with water for 15 minutes. Get prompt medical attention.

KEEP IN COOL, DRY PLACE—REPLACE LID TIGHTLY.

WARNING: Handle with care. When measuring Chlorine Egg Rinse, use only a china, plastic or enamel cup or spoon that is completely dry, clean and free from any foreign matter, liquid or solid. Chlorine Egg Rinse is a strong oxidizing agent. Contact with heat, acids, combustible organic or oxidized materials (such as vinegar, paint products, beverages, tobacco, cleaners, soap products, pine oil, kerosene, paper, rags, etc.) may cause fire. In case of fire, douse liberally with water. Never mix Chlorine Egg Rinse with anything except water. Keep in cool, dry place in original container. Always replace lid.

Do Not Reuse Container. Destroy When Empty.
