**200 ppm available chlorine solution**  
 1 teaspoon to 2 gallons of water

Solutions containing a minimum original strength of 100 ppm chlorine, shall be in contact with the area to be sanitized for at least 2 minutes. This solution during the sanitizing process should not be allowed to fall below 50 ppm available chlorine.

A starting concentration of 100 ppm available chlorine may be used only if testing facilities are available so that the solution can be adjusted periodically to prevent the concentration from falling below 50 ppm at any time. If such facilities are not available, a starting concentration of 200 ppm must be used.

**POISON – WARNING**  
**KEEP OUT OF REACH OF CHILDREN**  
**SEE ANTIDOTE STATEMENT AND**

*Internal*— Drink large quantities of water or milk. Follow with Milk of Magnesia, vegetable oil, or beaten eggs. Call physician immediately.

*Eyes*—Wash eyes with water for 15 minutes. Get prompt medical attention.

**WARNING:** Handle with care. When measuring CHLORINE SANITIZER-50, use only china, plastic, or enamel cup or spoon that is completely dry, clean, and free from any foreign matter, liquid or solid. CHLORINE SANITIZER-50 is a strong oxidizing agent. Contact with heat, acids, combustible organic or oxidizable materials (such as vinegar, paint products, pine oil, kerosene, paper, rags, etc.) may cause fire. In case of fire, douse liberally with water. Never mix CHLORINE SANITIZER-50 with anything except water. Keep in a cool, dry place in original container. Always replace cap.
