100.0%

\*CO-RAL® Reg. TM in U.S. Pat. Off. by Farbenfabriken Bayer A.G., Chemagro Corp., licensee  
†U.S. Patent No. 2,748,146

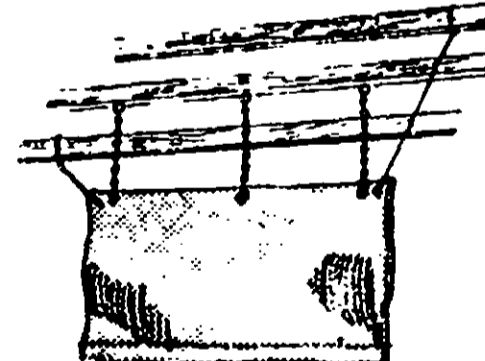

### DIRECTIONS

#### HOW TO HANG:

Hang Purina RUB-A-DUSTER by means of rope or chain placed through grommets along top edge of bag. For horn fly and lice control, adjust height so that bottom of bag will hang a little below the backline of the animals using it. To aid in reducing face flies, the bottom of the bag should be 2 feet from the ground to assure that the faces of the cattle will be dusted. The bag must be located so the animals will be forced to use it daily.

Pull rip cord located a few inches above bottom of hung bag to allow insecticide dust to settle into lower portion of bag.

**CAUTION:** Harmful if inhaled or absorbed through the skin. Do not get in eyes or on skin. Do not breathe dust. Wash thoroughly with soap and warm water after handling. Do not contaminate food or feed. Keep out of reach of children. If poisoning occurs, obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression.

#### WHERE TO HANG:

**BEEF CATTLE**—Suspend RUB-A-Duster in locations protected from the weather where animals will frequently dust themselves or in gateways or lanes through which the animals pass daily for water, feed or mineral.

**DAIRY CATTLE**—For lactating dairy cows, hang RUB-A-DUSTER in the exit of the milking barn.

Restrictions: Do not hang RUB-A-DUSTER over feed, mineral, or water troughs.

**CAUTION:** KEEP OUT OF REACH OF CHILDREN  
SEE CAUTION STATEMENT BELOW

**TO PHYSICIAN**—Atropine sulfate is antidotal. 2-PAM is also antidotal and may be administered in conjunction with atropine.

Do not re-use empty bag for any other purpose. Destroy bag by burying or discard in a safe place.

This product is toxic to fish, birds and other wildlife. Do not contaminate water by cleaning of equipment, or disposal of waste. Use this product only as specified on this label.
