Gentlemen:

Subject: Purina Rat-A-Rest Pellets
EPA Registration No. 602-306
Your Letters of August 21, 1984, and January 12, 1985

We have received your efficacy and fish and wildlife data (Accession No. 254652) and have found it acceptable to support this formula only. We note that you have deleted the single feeding claim for house mice. We have received a letter of authorization from Chempar to reference their data.

The amendment referred to above, submitted in connection with registration under FIFRA sec. 3(c)(7)(A), is acceptable, provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product for shipment:

a. After "Non-urban areas," insert "inside" before "agricultural."

3. Submit five (5) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(a). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Keep away from humans, domestic animals and pets. May be harmful or fatal if swallowed or absorbed through the skin because this material may reduce the clotting ability of the blood and cause bleeding.

Do not get in eyes, on skin or on clothing. Wash arms, hands, and face with soap and water after applying and before eating and smoking. If swallowed, call a physician at once.

NOTE FOR PHYSICIAN: If ingested, administer Vitamin K₁ intramuscularly or orally as indicated in bishydroxycoumarin overdoses. Repeat as necessary based on monitoring of prothrombin times.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Keep out of lakes, streams, or ponds.

GENERAL CLASSIFICATION

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS:

For control of Norway rats, Roof rats and House mice. May be used in these two areas:

Urban areas: May be used in and around the periphery of homes, industrial, commercial, and public buildings. May also be used in alleys. Do not use in sewers.

Non-urban areas: May be used inside of homes and agricultural buildings.

In both areas treated baits must be placed in tamper-proof boxes or in locations not accessible to children, pets, domestic animals or wildlife. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

SELECTION OF TREATMENT AREAS:

Determine areas where rats and/or mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Remove as much food as possible.

APPLICATION DIRECTIONS:

NORWAY AND ROOF RATS:

Norway rats may consume a lethal dose in one feeding with first dead rodents appearing four or five days after treatment begins.

Apply 4 to 16 ounces of bait (usually at intervals of 15 to 30 feet) per placement. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.

HOUSE MICE:

Apply 1/4 to 1/2 ounce of bait at intervals of 8 to 12 feet per placement. Larger placements (up to 2 ounces) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease.

RATS & MICE:

Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and unconsumed bait according to "Disposal" paragraph. To prevent reinfestation, eliminate food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish bait as needed.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Rat-A-Rest

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

QUALITY CONTROLLED BY PURINA RESEARCH
EPA Est. No. 609-MO-1

PRECAUTIONARY STATEMENT
HAZARD TO HUMANS AND DOMESTIC ANIMALS
CAUTION

Keep away from humans, animals and pets. May be harmful if swallowed or absorbed through skin because this material interferes with the clotting ability of the blood, causing internal and external bleeding.

Do not get in eyes, on skin or clothing. Wash arms, hands and face with water after applying. Do not eat, drink, or smoke while eating and smoking. If swallowed, consult a physician at once.

NOTE FOR PHYSICIAN: Administer Vitamin K, intravenously or orally as indicated in overdose. Repeat as necessary on monitoring of prothrombin time.

ENVIRONMENTAL HAZARD: This product is toxic to fish and other aquatic life. Do not use near lakes, streams, or ponds.

MADE IN PURINA CO.

Larger placements (up to 2 ounces) may be needed at point of high mouse activity. Maintain uninterrupted supply of free bait for 15 days or until signs of mouse activity cease.
RATS & MICE: Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and unconsumed bait according to "Disposal" paragraph. To prevent reinestation, clean food, water, and harborage as much as possible. If reinestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replace bait as needed.

APPLICATION DIRECTIONS:
NORWAY AND ROOF RATS: Norway rats may consume a lethal dose in one feeding with first dead rodents appearing four or five days after treatment begins. Apply 4 to 16 ounces of bait (usually at intervals of 15 to 30 feet) per placement. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.
HOUSE MICE: Apply 1/2 to 1 ounce of bait at intervals of 6 to 12 feet per placement.
