in EPA Letter Dated:

PLACE PACK

OCT 3 1985

Mouse Poison  
For Indoor and Outdoor  
Rodent Control

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.

602-315

Kills House Mice

House mice consume a lethal dose in a single feeding with dead rodents appearing two to three days after treatment begins. Rodents cease feeding after consuming a lethal dose in a single-night's feeding. ASSAULT Mouse Place Pack is effective against anticoagulant-resistant mice.

ACTIVE INGREDIENTS:

bromethalin: N methyl-2,4-dinitro-N-(2,4,6-tribromophenyl) -  
6-(trifluoromethyl) benzenamine ..... 0.01%

INERT INGREDIENTS:

..... 99.99%  
100.00%

**PRECAUTIONARY STATEMENTS  
HAZARD TO HUMANS AND DOMESTIC ANIMALS  
CAUTION**

*Reg 4 602-35  
MMV p. 2  
p. 4065*

Keep away from humans, domestic animals and pets. May be harmful or fatal if swallowed. Avoid contact with skin, eyes or clothing. In case of accidental contact, flush eyes or skin with water and wash contaminated clothing. Seek medical attention immediately if ingested or if breathing difficulty occurs or irritation persists. Wash hands thoroughly after handling Assault Mouse Place Pack.

**NOTE TO PHYSICIAN:**

Assault Mouse Place Pack is not an anticoagulant type of rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish, birds and other wildlife. Keep out of any body of water.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**USE RESTRICTIONS**

For control of house mice in and around homes, industrial and agricultural buildings, and similar man-made structures. May also be used in alleys located in urban areas, inside transport vehicles (ships, trains, aircraft), and in and around related port or terminal buildings. Do not use Assault Mouse Place Pack in sewers. Bait must be placed in tamper-proof bait boxes or in locations inaccessible to children, pets, domestic animals or wildlife. Do not place baits in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

**SELECTION OF TREATMENT AREAS**

Determine areas where mice will most likely find and consume the bait. Generally, these areas are along the walls, by gnawed openings, in or beside burrows, in corners, and concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Remove as much food accessible to rodents as possible.

p. 5 of 5

## APPLICATION DIRECTIONS

Assault Mouse Place Pack is a new rodenticide completely unlike anticoagulants. Generally rodents will consume a lethal dose in a single feeding with death occurring two or three days later.

**HOUSE MICE:** Apply one place pack per placement at 8 to 12 foot intervals depending upon activity.

**BAITING STRATEGY:** Highest bait consumption is expected to occur on the first day or two after treatment. After several days, inspect the placements and replenish bait at sites where there is evidence of heavy feeding. Although one night's feeding will usually provide a lethal dose, maintain bait for at least a week to provide all rodents a chance to feed on the bait. Baiting should be continued until all signs of feeding have ceased. Where a continuous source of infestation is present, establish permanent bait stations and replenish bait as needed.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**STORAGE:** Store in a cool, dry place away from other chemicals. Keep containers closed.

**PESTICIDE DISPOSAL:** Pesticide that cannot be used according to label instructions must be disposed of according to applicable federal, state or local procedures.

**CONTAINER DISPOSAL:** Do not reuse empty containers. Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by State and local authorities. If burned, stay out of smoke.
