2

If these placepacks are not to be sold individually, it should not be necessary to have these claims on the placepack's label.

2. Make sure that the claim "CONTAINS BITREX" appears in print that is smaller and less conspicuous than that used for "KEEP OUT OF REACH OF CHILDREN", "CAUTION", AND "SEE OTHER CAUTIONS BELOW." (Since no other cautions actually follow "SEE OTHER CAUTIONS BELOW" on the front panel of this label, replace "BELOW" with text such as "ON BACK PANEL" which more accurately indicates where such cautions would be found.)

3. Change "one to three" to "two or more" in the second sentence of the first paragraph of the "APPLICATION DIRECTIONS" portion of the "DIRECTIONS FOR USE."

When you print placepack labels, preserve the organizational framework which appears on your proposed revised label and make sure that the layout of the label does not result in any required text being obscured. Do not divide the "DIRECTIONS FOR USE" between label panels. Note that if the single-feeding claim were deleted, it might be possible to place all of the required precautionary text on the front panel of the label (and eliminate the need for "SEE OTHER CAUTIONS ON BACK PANEL"). As it is important to limit their potential conspicuousness and attractiveness to children, labels for placepacks should not be brightly colored.

c. Label for container of 50 0.75-oz placepacks

1. Delete the claim paragraph from the front panel or modify it to read as shown below.

"House mice consume a lethal dose in a single feeding, with dead mice appearing two or more days after they eat the bait. Mice stop eating after consuming a lethal dose in a single-hight's feeding. ASSAULT Mouse Place Pack is effective against anticoagulant-resistant house mice."

2. Make sure that the claim "CONTAINS BITREX" appears in print that is smaller and less conspicuous than that used for "KEEP OUT OF REACH OF CHILDREN", "CAUTION", AND "SEE OTHER CAUTIONS BELOW." (Since no other cautions actually follow "SEE OTHER CAUTIONS BELOW" on the front panel of this label, replace "BELOW" with text such as "ON BACK PANEL" which more accurately indicates where such cautions would be found.)

3. Change "one to three" to "two or more" in the second sentence of the first paragraph of the "APPLICATION DIRECTIONS" portion of the "DIRECTIONS"

When you print labels, preserve the organizational framework which appears on your proposed revised label and make sure that the layout of the label does not result in any required text being obscured. Do not divide the "DIRECTIONS FOR USE" between label panels.

3. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Robert A. Forrest Product Manager (14) Insecticide-Rodenticide Branch Registration Division (7505C)

PRECAUTIONARY STATEMENTS HAZARD TO HUMANS & DOMESTIC ANIMALS

CAUTION

Keep away from humans, dom stic animals and pets. May be harmful or fatal if swallowed. Avoid contact with skin, eyes or clothing. In case of accidental contact, flush eyes or skin with water and wash contaminated clothing Seek medical attention immediately if ingested or if breathing difficulty occurs or irritation persists. Wash hands thoroughly after handling Assault Mouse Place Pack II.

NOTE TO PHYSICIAN:

Assault Mouse Place Pack II is not an anticoagulant type of rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

ENVIRONMENTAL HAZARDS

his product is toxic to mammals and birds. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help to prevent accidents:

1. Store product not in use in a location out of reach of children and pets.

- 2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
- 3 Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label

USE RESTRICTIONS For control of house mice in and around homes, industrial and agricultural buildings, and similar man-made structures. This product may also be used in alleys located in urban areas, inside transport vehicles (ships, trains, aircraft), and in and around related port or terminal buildings. Do not use Assault Mouse. Place Pack II in sewers. Do not place baits in areas where there is a possiblity of contaminating food or suffaces that come in direct contact with food. Do not broadcast placepacks or bait.

SELECTION OF TREATMENT AREAS: Determine areas where mice will most likely find and consume the bait. Generally, these areas are along the walls, by gnawed openings, in or beside burrows, in corners, and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much food accessible to mice as possible.

APPLICATION DIRECTIONS: Assault Mouse Place Pack II does not contain an anticoagulant rodenticide. Generally mice will consume a lethal dose in a single feeding with death occurring one or three days later.

Apply one place pack per placement. Space placements at 8 to 12 foot intervals.

Highest bait consumption is expected to occu. on the first day or two after treatment. After several days, inspect the placements and replenish bait at sites where there is evidence of heavy feeding. Although one night's feeding will usually provide a lethal dose, maintain bait for at least a week to provide all mice a chance to feed on the bait. Baiting should be continued until all signs of feeding have ceased. Conject and properly dispose of all dead rodents and leftover bait. Where a continuous source of infestation is present, establish permarent bait stations and replenish bait as needed.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE. Store in a cool, dry place away from other chemicals. Keep containers closed.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty containers Dispose of liner in a sanitary landfill or by incineration if allowed by state or local authorities. If burned, stay out of smoke.
