The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of ALGAE-OUT will help to maintain the water in a clean condition. ALGAE-OUT is compatible with the usual water treatment chemicals. By controlling algae growth with ALGAE-OUT, the chlorine demand of the pool may be significantly reduced.

DIRECTIONS For Swimming Pools:

- (1) If algae growth is observed, add 1 gal. ALGAE-OUT for each 10,000 gals. of water to kill and control those algal species most commonly found in swimming pools.
- (2) When existing growth is dead and algae have withered, clean the pool, draining and refilling if necessary, then add 1 gal. ALGAE-OUT per 25,000 gals. of water.
- (3) In a freshly filled pool, no algae being present, add 1 gal. of ALGAE-OUT per 25,000 gals. of water.
- (4) After pool water has been treated as in (1) and (2) or (3) above, add 1 gal. of ALGAE-OUT per 50,000 gals. of water every 5 to 7 days, or as needed, to maintain between 2 and 5 parts per million of active ingredient. NOTE: See service man for test kit.

CAUTION: KEEP OUT OF REACH OF CHILDREN

ALGAE - OUT

For the control of algae in swimming pools and for locker room disinfection.

ACTIVE INGREDIENTS

2,2,4,4-tetrahydroxy-1,3-dioxane	100
Methylisothiazolone	10
TOTAL	110

INERT INGREDIENTS

Water	900
Total	1000

Phenol Coefficients:
 Salmonella typhosa - 25
 Staphylococcus aureus - 40

CAUTION! KEEP OUT OF REACH OF CHILDREN
 SEE BACK PANEL FOR ADDITIONAL CAUTIONS.

An Exclusive Product of . . . **DIXIE CORPORATION • 2201 North Lamar St. • Dallas, Texas 75201**

DIRECTIONS For Locker Room Disinfection:

Guard against spread of athlete's foot fungi by mopping walkways, poolside and locker room floors with solution of ALGAE-OUT and Disinfectant. Use it also to disinfect bathing suits and caps.

- (1) Clean floors and runways with suitable detergent, then mop with solution containing 1 oz. ALGAE-OUT and Disinfectant per gal. of water.
- (2) After washing, immerse suits and caps for ten minutes in solution containing 1 oz. of ALGAE-OUT and Disinfectant per gallon of water. Wring and hang to dry.

CAUTION: Undiluted ALGAE-OUT concentrate may cause skin irritation or damage to the eyes. Harmful if swallowed. Avoid contact with skin and eyes. Do not take internally. In case of contact, flush immediately with plenty of water. For eyes, get medical attention. Avoid contamination of food.

CAUTION: KEEP OUT OF REACH OF CHILDREN
