APPLICATION:

Union Solvent 4276 is a general contact, non-selective herbicide for the control of weeds along roadways, walkways, irrigation ditch banks and similar areas. Apply at the rate of 20 to 50 gallons per acre. Spraying should be done preferably when weeds are leafed out but young. Thoroughly wet the plant using a coarse spray to reduce drift. Repeat as necessary to maintain control.

WARNING:

Do not contaminate irrigation water.
Do not allow spray to contact desirable plants.
Do not reuse empty drum. Return to drum reconitioner or destroy by perforating or crushing and burying in a safe place away from water supplies.

WARRANTY:

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
