

12 ml.

## ***mitox liquid***

**An aid in the treatment of bacterial infections of the external ear canal associated with ear mite infestation.**

### **MITOX LIQUID**

**Directions:** If severe accumulations of ceruminous material are present, clean ear before treatment with a ceruminolytic agent. Follow this cleaning with treatment with Mitox, as directed. Fill lower section with Mitox and massage gently to distribute evenly. For infections, repeat as needed. For ear mites, continue treatments at 10 day intervals until controlled.
