On Container*

**POTATOES**—Colorado potato beetle, Potato flea beetle, Potato leafhopper, Aphids, Southern Armyworm, Green stink bug, Leaf-footed plant bug and Potato tuber-worm, Early and Late Blight. Apply 60-65 pounds per acre when insects first appear or when potatoes are 4-6 inches high (whichever is first) and continue on a 7 to 10 day schedule. Shorten the interval if serious disease or insect conditions prevail. Workers entering treated areas the day of application should wear protective clothing. No time limitations. Do not plant root crops other than carrots, potatoes, and sweet potatoes as follow-up crops.

**CAUTION**

Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing dust mist. Avoid contact with skin, eyes or clothing. Avoid contamination of feed or foodstuffs. In case of contact with skin or eyes, flush with plenty of water; for eyes, get medical attention. Wash with soap and water after handling and before eating or smoking; wear clean clothing.

Do not apply or allow to drift to areas occupied by unprotected humans or beneficial animals.

Highly toxic to fish and wildlife. Do not contaminate any body of water nor apply when conditions favor drift from the crop area treated. Birds and other wildlife feeding on the treated area may be harmed.

This product is toxic to bees and should not be applied when bees are actively visiting the area.
