**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS
— DANGER —**

Corrosive poison. Fatal if swallowed. This bait may cause an allergic reaction. Wear rubber gloves and long sleeved protective clothing when handling. Do not get in eyes, on skin or on clothing. Do not breathe dust. Do not contaminate feed and foodstuffs. Wash arms, hands and face with germicidal soap and water after using and before eating or accepting anything by mouth or smoking. All spilled bait must be cleaned up immediately.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Do not allow bait to be exposed on soil surface. Do not apply directly to lakes, streams, or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Keep away from children and domestic animals.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE

Store only in original container in a dry place inaccessible to children and pets. Under lock and key in a posted storage area.

PESTICIDE DISPOSAL:

Wastes resulting from the use of this product may be disposed of on site or at an approved waste facility.

CONTAINER DISPOSAL:

Securely wrap original container in several layers of newspaper and discard in trash.

 Net Wt. 8 Oz

AN EFFECTIVE CONTROLLER

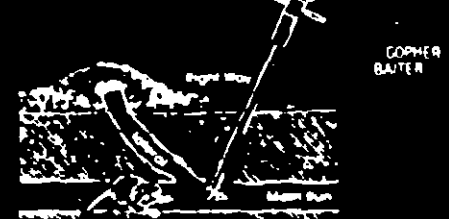

GOPHER-GO™ is especially prepared and scented to give effective results in the control of pocket gophers. It is scientifically prepared from selected ingredients to assure effectiveness.

**FOR USE IN SUBSOIL ONLY
DIRECTIONS FOR USE
— POCKET GOPHERS —**

USE RESTRICTIONS: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For use to control pocket gophers (Thomomys s.s. and Geomys s.s.). Do not apply this product by means of a burrow-blower machine.

SITE LOCATION: All domestic, outdoor, subsoil and terrestrial non-food uses.
GOPHER BAITER: Probe for gopher runways 6-8" from mound (shown in drawing) and 8-10" below soil surface; deposit bait in runway. Remove probe and cover hole with sod or sod. All spilled bait must be picked up or buried immediately.

OTHER METHODS: A LONG HANDED SPOON, remove the soft earth plug leading underground at a freshly thrown out mound of soil. Using the long handled spoon, introduce the bait as far down into the burrow system as possible. Close the opening to the surface being careful not to allow loose dirt to cover the bait. **IRON BAR:** bait may be deposited in underground runways by forming a hole in the runway with an iron bar. At each baited location, insert one teaspoon of bait and cover opening securely with a piece of sod or dirt. Do not permit dirt to slip in and cover dirt. Depending upon pocket gopher population levels, one pound of bait will treat one to eight acres.

NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product, other than horizontal on the label. (Under placement of risk of good and / or handling of the material when used and / or otherwise in contrary to local restrictions.)
