Mr. Brent Hazen
Wilco Distributors, Inc.
P.O. Box 291
Lompoc, CA 93438

Dear Mr. Hazen:

Subject: GOPHER GO
EPA Registration No. 641-1
GOPHER GO AG MAT
EPA Registration No. 641-2
Your Letters Dated May 3 and May 18, 1993

The Agency has reviewed the submissions referred to above and has the following comments:

1. The Confidential Statement of Formula (CSF) ^{for product 641-1,} dated May 18, 1993, is acceptable and supersedes all previous CSFs for this product.
2. The labeling for product 641-1, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable. A stamped copy of the label is enclosed for your records.
3. We require that you submit Storage Stability data (GRN 63-17) obtained for each of your products. Your proposal to generate data from one product and submit it for all six products is not acceptable.

Sincerely yours,

Robert A. Forrest
Product Manager (14)
Insecticide-Rodenticide Branch
Registration Division (H7505C)

**DANGER
POISON**

ACTIVE INGREDIENTS	50%
Strychnine Alkaloid	50%
INERT INGREDIENTS	99.50%
TOTAL	100.00%

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: CALL A PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY. If less than ten (10) minutes have passed since the poison was taken, give 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Have patient lie down in quiet, darkened room and keep him warm and quiet. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove victim to fresh air. Administer artificial respiration if indicated.

IF ON SKIN: Remove contaminated clothing at once. Wash affected areas with soap and water.

IF IN EYES: Flush eyes with plenty of water. Get medical attention if irritation persists.

NOTE TO PHYSICIAN

A. Administer 100% OXYGEN by positive pressure to provide as much pulmonary gas exchange as possible, despite seizures.

B. Administer ANTICONVULSANT DRUGS intravenously to control convulsions.

NOTICE: It may be difficult or impossible to stop the seizure activity without stopping respiration. Be prepared to maintain pulmonary ventilation mechanically. Tracheotomy may be necessary if seizures are prolonged.

See side panel for additional precautionary statements
