1 GALLON

Manufactured By

Thompson TOMATO FIX aids in the production of larger tomato crops and earlier crop harvest.

## DIRECTIONS

Use 1 fl. oz. (2 tbsp.) per 2 gallons of water.

This makes a solution of 50 ppm of Para-chlorophenoxyacetic Acid. Apply as a directed fine spray to blossom clusters when the majority of flowers in the cluster are open.

Do not apply directly to leaves or fruit.

Do not spray individual clusters more than once. Do not spray leaves or fruit. Do not make more than five applications per season.

Spray clusters very lightly for best results.
