FLIT[®] MLO

An Effective Mosquito Larvicide and Pupacide

Active Ingredients	98.8%
Mineral Oil	98.5
n-Decane!	0.3
Inert Ingredients	1.2%

DIRECTIONS

For larvae mosquito control in residential areas, municipalities, rural areas, tidal marshes, swamps, woodlands, growing crops and pasture for livestock including dairy cattle. Apply FLIT MLO to the surface of the water of mosquito breeding places with suitable equipment such as hand or power sprayers, mist machines, or by aerial application. Apply as a fine spray to reduce impact at the water surface. Care should be taken to ensure complete coverage. Do not add spreading agents or emulsify with water. Use at rates given in the table. Apply as needed when reinfestation occurs.

Type of Application	Condition of Area to be Treated	Gallons per Acre
Ground Application	None to medium vegetative cover. None to little surface debris.	2-3
	Medium to heavy vegetative cover. Heavy surface debris or waters high in organic content.	3-5
	Ponds containing untreated or partially treated sewage waste.	5
Aerial Application	None to medium vegetative cover.	1-2
	Medium to heavy vegetative cover.	2-3

FLIT MLO may be effective at lower rates than shown in the table for Anopheline species. Moderate to heavy rainfall within six hours after application may reduce effectiveness.

CAUTION KEEP OUT OF REACH OF CHILDREN

Contains petroleum distillate. May be harmful or fatal if swallowed. If swallowed, do not induce vomiting; call a physician immediately. Avoid breathing spray. Drain drum completely. Return empty drum to reconditioner or to metal salvage.
