FOR MILDEW STORAGE PROTECTION

Apply a thin layer of this product to the surface of the material to be protected. It will form a protective film which will prevent the growth of mold and mildew. It is especially useful for the protection of books, papers, and other documents. It is also useful for the protection of fabrics, leather, and other materials. It is safe for use on most materials and does not leave a residue. It is available in a variety of sizes and quantities.

MOTH KILLER DIRECTIONS

Apply a thin layer of this product to the surface of the material to be protected. It will form a protective film which will prevent the growth of moths and other insects. It is especially useful for the protection of woolen fabrics, silk, and other materials. It is safe for use on most materials and does not leave a residue. It is available in a variety of sizes and quantities.

DO NOT MIX PURE PARA

MILDEW DISC

for use in...

CLOSETS, WARDROBES, CHESTS, GARMENT BAGS

REMOVE CELLOPHANE—REPLACE DISC IN BOX

FOR MILDEW STORAGE PROTECTION: Remove any mildew growth from all articles in storage area. Remove cellophane and hang or place box above articles being stored. Keep storage place tightly sealed and disc will prevent growth and multiplication of mildew in tightly confined storage space which is not in daily use. Maximum protection is reached after 7 days (in a 44 cubic foot area). Replace disc when storage area is occasionally opened.

MOTH KILLER DIRECTIONS: Brush and clean (free from grease) articles thoroughly before storing. One disc gives protection in 44 cubic feet of tightly closed space. Remove cellophane and hang or place in disc box above articles being stored. May also be used in drawers, trunks and chests.

DO NOT MIX PURE PARA with Camphor, Naphthalene Flakes or Balls as these chemicals may cause crystals to melt. Neither fabrics subject to stain from perfume oil nor vinyl materials should come into direct contact with surface of disc.
