

PRECAUTIONARY STATEMENTS
Hazards to Humans
(and Domestic Animals)

DANGER Poisonous if swallowed, inhaled, or absorbed through skin or eyes. Do not get in eyes, on skin, or on clothing. Do not breathe fumes. Rapidly absorbed through skin. Wear natural rubber gloves, waterproof pants, boots, and goggles when handling. Wear a protective respirator jointly approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of the CFR Part 11.

Environmental Hazards

This product is toxic to fish, birds, and other wildlife. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance, contact your Regional Office of the Environmental Protection Agency.

Physical or Chemical Hazards

Do not use or store near heat or open flame.

Instructions for Formulation

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This pesticide may be used only for the formulation of an insecticide. Formulators using this product are responsible for obtaining EPA registration for their formulated products. Refer to Technical Bulletin for instructions for formulating and other information.

Note to Physician

Symptoms. Symptoms include weakness, headache, tightness in chest, blurred vision, non-reactive pupils, pupillary salivation, sweating, nausea, vomiting, diarrhea, and abdominal cramps.

Treatment: Atropine is the specific therapeutic antagonist of choice against parasympathetic nervous stimulation. If there are signs of parasympathetic stimulation, atropine should be tested at ten-minute intervals in doses of 1 to 2 mg adults, until complete atropinization has occurred. Morphine is contraindicated. Clear chest by postural drainage. Oxygen administration may be necessary. 2-PAM, a cholinesterase antidote, and may be administered in conjunction with atropine. Observe patient continuously for 48 hours. Repeated exposure to cholinesterase inhibitors may, without warning, cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Advise patient of further exposure until cholinesterase regeneration has been attained as determined by blood test.
