The Improved & BETTER way to KILL RATS OUTDOORS

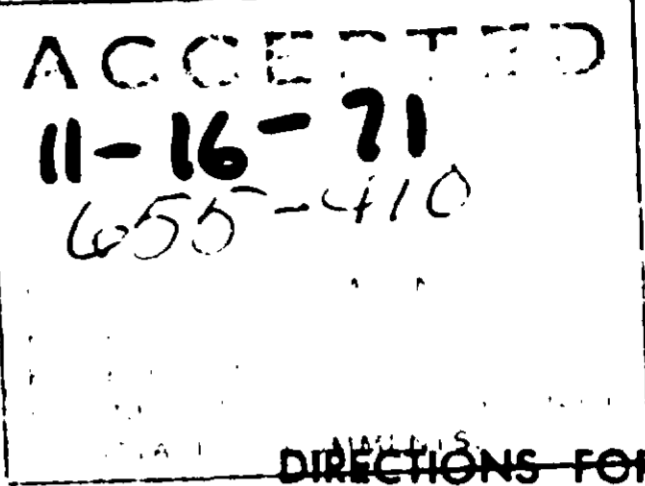

IN WET OR DAMP AREAS

Manufactured by:

PRENTISS DRUG & CHEMICAL CO., INC.

363 SEVENTH AVENUE

NEW YORK, N. Y. 10001

DIRECTIONS FOR USE

Place baits in locations where rats feed, water, or travel. Bait placements along walls, in corners, and concealed locations where rats can feed un-observed are desirable. Four ounces of bait per stations should be the minimum amount used. Or snap off two-2½ ounces rat killer units for each bait station.

Keep rat feeding stations well supplied. Continue use for at least 15 days, or until signs of rats have dissappeared. In heavily rat infested areas, more than one package may be required.

CAUTION

Keep Out of Reach of Children.

Protect from children, pets, or domestic animals. If swallowed, call a physician immediately. Treat as for overdose of dicumarol anti-coagulant. Do not expose in areas accessible to dogs, unless placed in wire baskets within protected stations.

Baits should be placed in areas inaccessible to children, pets, wildlife and domestic animals or in tamper proof bait boxes.
