DIRECTIONS FOR USE (cont'd.)

For best results, use a good clean sprayer, free of rust, which produces a fine mist.

FOR FLYING INSECTS: Flies, mosquitoes, small flying moths, gnats & wasps: Close door and windows. Spray freely towards ceiling in all directions until room is logged with mist. When spraying, keep about three feet from interior walls, fabrics and furniture. Doors and windows may be opened after 10 minutes. Do not remain in treated area. Ventilate the area after treatment is completed.

FOR CRAWLING INSECTS: Roaches, waterbugs, silverfish & crickets: Spray thoroughly into cracks and crevices, under and behind sinks, cupboards, drawers, woodwork, refrigerators, pipes and drains, where these insects hide. Spray directly on as many insects as possible. Repeat application as necessary.

FOR CLOTHES MOTHS & CARPET BEETLES: Clean and spray closets thoroughly, to reach all hiding places. Clean and brush woolen articles. Repeat application every 30 days. When carpets are infested, spray both sides thoroughly. When spraying near fabrics, keep spray in constant motion, at least 36 inches away from fabric. Spraying closer may cause stains.

FOR BEDBUGS: Spray baseboards, molding and floor boards. Spray mattresses and box springs. It will be necessary to dismantle the bed completely, thoroughly spraying each part, including mattress and box springs. All baseboards and wall cracks about the bedroom, should be thoroughly treated. Repeat application and direct contact of the pest with spray are necessary for control.

FOR ANTS: Spray trails, hills, around window frames and openings around pipes and baseboards, where ants crawl, hitting as many as possible. Repeat application as necessary.

FOR FLEAS: Spray floors, floor coverings and sleeping quarters of pets and other infested areas. Repeat as required. Do not spray pets.
