DIRECTIONS: For best results, use a good clean sprayer - free of rust - which produces a fine mist.

FOR FLYING INSECTS: Flies, mosquitoes, small flying moths, gnats and wasps: Close doors and windows. Spray freely towards ceiling in all directions until room is fogged with mist. When spraying, keep about 3 feet from interior walls, fabrics and furniture. Doors and windows may be opened after 10 minutes.

FOR CRAWLING INSECTS: Roaches, waterbugs, silverfish and crickets: Spray thoroughly into cracks and crevices, under and behind sinks, cupboards, drawers, woodwork, refrigerators, pipes and drains, where these insects hide. Spray directly on as many insects as possible. Repeat application as necessary.

(1) FOR CLOTHES MOTHS & CARPET BEETLES: Clean and spray closets thoroughly, to reach all hiding places. Clean and brush woolen articles. Repeat application every 30 days. When carpets are infested, spray both sides thoroughly. When spraying near fabrics, keep spray in constant motion, at least 36 inches away from fabric. Spraying closer may cause stains.

FOR BEDBUGS: Spray baseboards, molding and floor boards. Spray mattresses, particularly around seams and tufts. Take beds apart and spray into all joints. Repeat application as necessary.

FOR ANTS: Spray trails, hills, around window frames and openings around pipes and baseboards, where ants crawl, hitting as many as possible. Repeat application as necessary.

FOR FLEAS: Spray floors, floor coverings and sleeping quarters of pets and other infested areas. Repeat as required. Do not spray pets.

(2) FOR OUTDOOR USE: To repel temporarily: Flies, mosquitoes, gnats, wasps, crickets, ants: On porches, terraces, lawns and at outdoor gatherings, spray frequently around chairs, tables, floors, ground and surrounding air.
