

# RX SPECIAL BUG KILLER

## RESIDUAL & CONTACT - SPRAY -

**TOUGH**

**INSECT  
PESTS**

ACCEPTED

4 1975

General Insecticide,  
Rodenticide Act,  
the pesticide

655-608

ANTS

Kills: Roaches, Flies, Mosquitoes, Ants,  
Silverfish, Fleas, Bedbugs, Spiders,  
Carpet Beetles, Crickets, Moths  
and certain other insects.

INHIBITS WASPS, HORNETS, HONEY BEES.

### CAUTION

KEEP OUT OF REACH OF CHILDREN  
(See Side Panel for Additional Cautions)

#### ACTIVE INGREDIENTS:

Petroleum distillate	98.70%
Ronnel (O, O-Dimethyl O(2, 4, 5-trichlorophenyl) phosphorothioate*)	1.90%
Technical Piperonyl Butoxide**	0.25%
Pyrethrins	0.05%

\*From technical grade.  
\*\*Equivalent to 0.2% (Butylcarbyl)  
(6-propylpiperonyl) ether and 0.05%  
of related compounds.

**PARSONS CHEMICAL WORKS, Inc.**  
*Grand Ledge, Michigan 48831*

### CAUTION

Harmful if swallowed. Avoid skin contact.  
Avoid inhalation of spray mist. If it gets  
into the eyes wash out eyes at once with  
plenty of water. Wash thoroughly after  
use.

Do not allow children in treated areas until  
surfaces are dry.

Keep away from heat, open flame, pilot  
lights, heating elements or other hot  
sources of heat. Keep container closed  
when not in use. Avoid contamination of  
cooking utensils, food, feed and water sup-  
plies. Remove fish, birds and plants from  
room during spraying.

KEEP OUT OF THE REACH OF CHILDREN.

Note to physician: Ronnel is a cholines-  
terase inhibitor. Atropine is an antidote.  
Treat symptomatically.

Do not re-use empty container. Destroy it  
by crushing. Bury or discard in a safe place.

Chemical Company, U.S. Patent No. 2,599,516

**NOTICE TO PURCHASER** — Buyer assumes  
all risks of use, storage or handling of this  
material not in strict accordance with di-  
rections given herewith.

EST. REG. NO. 1969-111-1

EPA REG. NO. 1969-46

Reg. # 655-608

### EASY TO USE IN HAND OR POWER SPRAYER

Use as it comes from this container, do not dilute with anything else.

An insecticide for dock areas, supermarkets, restaurants, institutions,  
food processing plants, (meat packing plants) apartment buildings, food  
handling establishments, warehouses, furniture storages, libraries and  
homes, if label directions are followed carefully.

### DIRECTIONS

Apply a course spray for the control of insects in supermarkets, res-  
taurants, homes, institutions, food and processing plants. Spraying  
operation should be done when food processing plants are not in op-  
eration, food handling establishments, warehouses, furniture storages  
and libraries. RX Special Bug Killer will not mix with water.

**ROACHES, ANTS, SILVERFISH, WATERBUGS, SPIDERS, CRICKETS:** Spray  
directly on insects where possible. Also spray to wet insect trails and  
surfaces where insects may breed or congregate such as under  
sinks, drainboards, stoves, refrigerators, in cabinets, around base-  
boards, door sills and frames, around window frames, garbage cans,  
garages, and out-buildings. Re-treat as necessary.

**FLEAS IN BUILDINGS AND PET QUARTERS:** Spray thoroughly floors,  
walls, rugs, carpets, cracks, crevices, sleeping quarters of pets or  
other infested areas. Not to be used in buildings housing meat or  
dairy animals or poultry.

**CARPET BEETLES:** Apply to floor areas and baseboards. Spray directly  
into cracks, crevices, and under carpets where insects may be found.  
Treat both the underside and topside of infested carpets. Spray inside  
of trunks, closets and infested areas of shelving. Re-treat as necessary.

**BEDBUGS:** Spray mattress and bedding lightly including seams and  
folds. Spray bed frames, springs, along baseboards, carpet edges,  
cracks and hiding places about rooms. Apply liberally to inside walls  
and floors of laundry trucks. Re-treat as necessary.

**FLIES, MOSQUITOES, FLYING MOTHS AND WASPS:** Spray surfaces until  
wet where these insects alight or congregate such as walls of porches,  
garages, house foundations, etc. Re-treat as necessary.

**FLEAS AND ANTS OUTDOORS:** Spray to wet localized infestations of  
these insects. For ants, thoroughly wet hills and runways. Re-treat  
as necessary.

**INHIBITS INFESTATION OF: HONEY BEES, WASPS, HORNETS, YELLOW  
JACKETS** — Spray thoroughly all nests and places where insects abide,  
hitting as many as possible. It is more difficult to control bees that  
enter a structure through a small hole. Therefore, it is advisable that  
some of the side boards or other obstruction be removed so that spray  
can penetrate the nest and hit the insects. Repeat treatment  
as necessary.
