#### **Directions for Use:**

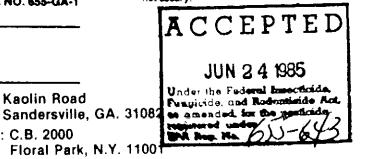

It is a violation of Federal law to use this product in a manner Inconsistent with its labeling.

In mushroom production and processing: To control mushroom flies or fungue gnate in growing houses, apply at a rate of 1 ounce. per 1000 cubic feet of space. rogger should be operated 8 to 30 feet sway from beds and directed slightly upward over them. Circulating fans should be left in operation, but for best results, refrigeration should be turned off. In packing and canning plants, use at a rate of 1 ounce to 2000 cubic feet of space.

The use of this product in food processing establishments should be confined to time periods when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Stored food products which are infested should be furnigated or treated. by other affective inethode using an approved product intended. for that purpose.

Space Spray: For control of accessible, exposed stages of flies, including fruit flies, mosquitoes, small living moths, gnats, wasps, hornets, cheese skippers, and these common stored product pests: granary weevils, rice weevils, confused flour beetles, saw-toothed grain beetles, spider beetles, cigarette beetles, Drugstore beetles, Angoumois grain moths, Mediterannean flour moths, Indian meal moths, Tobaccomoths, meal worms, and grain mites: Close windows and doors and shut off ventilating systems. Use a logger or vaporizor adjusted to deliver an aerosol spray (no droplets over 50 microns in diameter and 80% less than 30 microns). Apply at the rate of 1 ounce per 1000 cubic feet of space. Direct the spray toward the ceiling and upper corners of the area and behind obstructions. For best control of wasps and hornets, apply directly to nests in the evening when the insects have returned to the nests. Keep the area closed for at least 15 minutes. Vacate the treated area and ventiliate before reoccupying. Repeat treatment as necessary

Space and Contact Spray: For control of accessible, exposed stages of ailverfish, crickets, roaches, spiders, scorpions, clover mites, cheese mites, earwigs, and ants, first using equipment which can deliver a pin spray, direct spray into all cracks and crevices in woodwork, walls, floors, underneath sinks, behind pipes and in all places where these insects are known to seek shelter. Contact as many insects as possible, spray directly all ant trails. Do not allow spray to contact stored food. Then, shutting all doors, windows and shutting off all ventilating systems proceed with space spraying directions as given above. Use a dosage rate of 1 ounce per 1000 cubic feet of space. Keep the area closed for at least 15 minutes. Vacate the treated area end ventilate before reoccupying. Repeat treatment as necessary.
