## JUN 1 1 1996

Richard A. Miller Prentiss Incorporated C.B. 2000 Floral Park, NY 11002-200

Dear Mr. Miller.

Subject: Deleted uses Prentox<sup>(R)</sup> 2-lb. Methoxychlor Spray EPA Registration No. 655-742 Amendment application of October 24, 1995

The amendment referred to above, submitted in connection with registration under FIFRA, is acceptable provided that you:

The use for mosquito control is no longer being supported, therefore you must delete the all use direction for mosquito control wherever it appears on the labeling.

Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours

DAE

Dennis H. Edwards, Jr. Product Manager (19) Insecticide Rodenticide Branch Registration Division (7505C)

### Enclosure

# 2 Ib. METHOXYCHLOR SPRAY

(One Gallon Contains 2 Pounds Technical Methoxychlor) Gypsy Moth, Inchworms, Japanese Beetles and Certain other insects on Roses, Flowers, Shrubs, Trees, Fruits and Vegetables.

**ACTIVE INGREDIENTS:** Methoxychlor: 1, 1, 1-trichloro-2, 2-bis (p-methoxypheny) ethane ..... 24.0% TOTAL 100.0%

E.P.A. EST. NO. 655-GA-1

Contains Xylene Range Aromatic Solvent PRENTOX®—Registered Trademark of Prentiss Incorporated

## **KEEP OUT OF REACH OF CHILDREN** CAUTION

STATEMENT OF PRACTICAL TREATMENT If swallowed—Call a physician immediately. Gastric lavage is indicated if material was taken internally. DO NOT INDUCE vomiting unless other treatment is not available. Vomiting may cause aspiration pneumonia. If it is necessary to induce vomiting, give person one or two glasses of water and insert finger in back of throat, Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person. If inhaled—Remove person to fresh air. Apply respiration if indicated. If on skin—Wash immediately with soap and water. If in eyes—Flush with plenty of water.

SEE BELOW FOR ADDITIONAL PRECAUTIONARY STATEMENTS

## PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION—Harmful if swallowed. Avoid contact with skin. Avoid prolonged or repeated breathing of spray mist. Do not contaminate feed and foodstuffs. Read entire label and use strictly in accordance with label cautions and directions. Personal Protective Equipment: Some materials that are, chemical resistant to this product are listed below. If you want more options follow the instructions for category E on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear long-sleeved shirt and long pants, chemical resistant gloves, such as barrier laminate or nitrile rubber or neoprene rubber or viton, and shoes plus socks. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations Users should wash hands before eating, drinking, chewing gum, using fobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS This product is toxic to fish, and aquatic invertebrates. For tarrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Aerial application over such sites is permissible only when they are not visible from above the tree canopy. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring they are not visible from above the tree canopy. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters. PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open fiame.

E.P.A. REG. NO. 655-742

#### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner DO NOT APPLY THIS PRODUCT THROUGH ANY TYPE OF IR-

RIGATION SYSTEM. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

#### AGRICULTURAL USE REQUIREMENTS

AGRICULTURAL USE REQUIREMENTS Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural vorkers on farms, forests, nurseries, and greenhouses, and the handlers of agricultural pesticides, it contains requirements for training, decontamination, notifica-tion, and emergency assistance, it also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PFP), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

(REI) of 12 hours.

PEC regurds for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls, chemical resistant gloves, such as barrier laminate or nitrile rubber or reopreme rubber or viton, and shoes plus socks.

NON-AGRICULTURAL USE REQUIREMENTS The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on

Tamis, forests, nurseries, or greenhouses. Do not enter treated areas without protective clothing until sprays have dried. NOTE: Do not add grain to bin for at least 24 hours or until walls have dried out thoroughly.

NOTE: If exposed to prolonged cold, place in warm storage (50° to 80° F.) for several hours and agitate before using. Users should observe the usual precautions concerning application of oil-containing products to crops during high temperatures, since many crops are then more susceptible to oil injury.

FOR CONTROL OF ELM BARK BEETLES - Hydraulic Sprayers --- Mix with water at the rate of 8 gallons Prentox 2lb. Methoxychlor Spray to 100 gallons water. Apply sufficient spray to thoroughly wet all bark on trunk, limbs and twigs: 20 to 30 gallons of spray are usually required for a 50-foot elm tree.

Mist Blowers - Mix with water at rate of 5 gallons Prentox Methoxychlor 2 lb. Spray to 10 gallons water. Thorough coverage of all bark surfaces s important, usually 2 to 3 gallons of spray are required to adequately cover a 50-foot elm tree.

All applications should be made as a dormant treatment before new leaves or flowers appear in the spring. Apply when temperature is above 45°F and there is no danger of freezing before the spray dries.

before harvest or grazing.

Cowpeas/soybeans-do not graze or teed treated soybean hay or straw, or cowpea vines or hay to livestock. Leafhopper, spittlebug — Use 1 to 2 qts. in sufficient water to cover 1 acre Alfalfa caterpillar, flea beetles — Use 1 ½ to 2 qts. in sufficient water to cover J acre.

Alfalfa weevillarvae, Alfalfa webworm, Falt armyworm, Clover leaf weevil Mexican bean beetles, Pea weevil, Soybean caterpillar, Velyet bean caterpillar - Use 2 to 3 qts. in sufficient water for 1 acre. Obwpea curculio, Japanese beetle - Use 3 qts. in sufficient water for 1 acre.

Use 3 to 4 qis, in sufficient water for 1 acre Armyworm

POTATOES - To control Colorado potato beetle, leafhopper and flea beetles use 2 quarts in sufficient water for 1 acre. Repeat as

ACCENT AND A CONTRACT OF A CONTRACT bins, best gallon in 10 gallons water applying rate of 2 gallons spray per 1,000 sq. ft. before products are stored. This aids in control of cadelie, flat grain beelle, saw toothed grain beetle, lesser grain bogg, red flour beelle, long-headed flour beetle, rice weevil, granary weevil, concused flour beetle, toreign grain beetle and hairy funds beetle.

NGTE: Donotadd grain to bin for at least 24 hours or until walts have Aried out thoroughly. .

#### LIVESTOCK

BEEF AND DAIRY CATTLE; GOATS; SHEEP; SWINE

Apply the following rates of "Prentix Methoxychlor 2 lb. MethoxychlorSpray" insecticide for the control of hornflies, lice, short-nosed and long-fiesed cattle lice, ticks, keds, and fleas.

3.5

### DIRECTIONS FOR USE (Cont'd.)

Repeat treatment every 3 weeks, as needed: Beef Cattle (Do not apply to animals being finished for slaughter; do not contaminate teed or water) — Mix 2 qts. in 25 gals. of water. As a spray, use 2 qts. of the mixture per head for larger animals and proportionalely less for smaller ones.

The second s

ST. Toyle ggg

-----

Thoroughly wet animals. Do not use in dipping vats. For control

of tails louse of cattle, mix4 to 6qts, in 25 gals, of water and apply % pt. or less as a spray on the infested tail only. Dairy Cattle (Non-lactating) — Mix2 qts, in 25 gals, of water. As a spray use 2 qts, of the mixture per head for larger animals and proportionately less for smaller ones. Thoroughly wet animals.

Do not use as a dip. Do not apply during lactation or within 2 weeks of freshening. Do not apply during lactation or within 2 weeks of freshening. Do not apply to lactating animals within 5 hours of milking or during milking. Goats, Sheep and Swine — Mix 2 gts. in 25 gals. of water. As a spray, use 1 qt. of the mixture or less per head for larger animals and proportionately less for smaller animals. Throughly wet animals. Do not apply to lactating goats.

-MOSQUITO-CONTROL-METHOXYCHLOB-2-Ib-SPRAY-is effective in the control of Mosquitoes, both Adult and Larvae on non-Agricultural land and may be applied as a fog or mist from suttable equipment-

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping prohibited. STORAGE: If container is damaged; Stop any leaks by

repositioning the container or by patching or otherwise repairing the leaks. Take care to avoid contact with pesticide and wear protective gear. On cleanup of spilled liquids, wear protective equipment as required to prevent contact with the product or its vapors. Cover the spilled areas with generous amounts of absorbent material, such as clay, diatomaceous earth, sand or sawdust. Sweep the contaminated absorbent on to a shovel and put the sweepings into a salvage drum. Dispose of wastes as below. Do not store, use, pour or spill near heat or open flame.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities.

MOSQUITO CONTROL - METHOXYCHLOR 21b. SPRAY is effective in the control of Mosquitoes, both Adult and Larvae on non-Agricultural land and may be applied as a fog or mist from suitable equipment.

#### DIRECTIONS

ADULT MOSQUITOES - THERMAL FOG EQUIPMENT. Thermal fogging is more effective in early morning and late evening. Application time for control of Adult Mosquitoes should coincide with time of most activity of the Mosquito. Avoid thermal fogging when winds exceed 5 miles per hour as effectiveness is reduced.
