Prentox Flea, Tick and Roach Control
EPA File Symbol 655-800

FLEA, TICK and ROACH CONTROL

with Natural Pyrethrins and Nylar[®] Insect Growth Regulator

ACTIVE INGREDIENTS:

Pyrethrins	1.0%
Piperonyl Butoxide Technical*	5.0%
2-[1-methyl-2-(4-phenoxyphenoxy)ethoxy] pyridine	0.2%

INERT OTHER INGREDIENTS:**	93.8%
TOTAL:	100.0%

*Equivalent to 4.0% (butylcarbityl-6-propylpiperonyl) ether and 1.0% related compounds.
**Contains Petroleum Distillates

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER**

Corrosive. Cause irreversible eye damage. Causes skin irritation. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Wear goggles or face shield. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse. Do not allow children or pets to contact treated surfaces until spray has dried. Do not use on plants. Do not allow spray to contact food, feedstuffs or water supplies. Thoroughly wash dishes and food handling utensils contaminated with this product. Remove pets and cover fish aquaria before spraying.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters. Apply this product only as specified on this label.

PHYSICAL HAZARDS

Do not use, pour, spill or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

General information: Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons. Do not enter treated areas without protective clothing until sprays have dried.

The Insect Growth Regulator in this product acts on the immature life stages of cockroaches and fleas to prevent adults from developing. The natural pyrethrins and synergist in this product will give quick control of all exposed stages of all of the insects listed on this label which are contacted by the spray. Flea control on pets is important in the prevention of introduction of adult fleas indoors. When using this product, if fleas are a problem on pets, the pets should be treated with an effective registered flea control product, to prevent reinfestation from the reintroduction of fleas indoors.

As a surface spray: For initial clean up of severe infestations of listed insects, dilute at a rate of 1 part concentrate and 4 parts water. For treatment of normal infestations, dilute 1 part concentrate with 9 parts water. If surface application is used, spray floors, walls and other surfaces, applying at a rate of 1 gallon per 1000 square feet of surface.

To control ants, brown dog ticks, clovermites, cockroaches (American, German and Oriental), crickets, silverfish and spiders, use a good sprayer adjusted to deliver a coarse, wet spray. Direct the spray into hiding places, cracks and crevices, behind shelves and drawers. For silverfish, spray bookcases. For ants, spray trails, nests and points of entry.

To control fleas in non-carpeted areas, dilute 1 part concentrate and 19 parts water. To control fleas in carpeted areas, dilute 1 part concentrate and 14 parts water. Thoroughly spray infested areas, pet beds, resting areas, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames and localized areas of floor covering. To prevent reinfestation from the reintroduction of fleas indoors by infested pets, pets should be treated with an effective registered flea control product.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

STORAGE: Store in cool, dry area. If container is damaged: Stop any leaks by repositioning the container or by patching or otherwise repairing the leaks. Take care to avoid contact with pesticide and wear protective gear. On cleanup of spilled liquids, wear protective equipment as required to prevent contact with the product or its vapors. Cover the spilled areas with generous amounts of absorbent material, such as clay, diatomaceous earth, sand or sawdust. Sweep the contaminated absorbent onto a shovel and put the sweepings into a salvage drum. Place leaking container into a similar drum or glass container. Mark the container with name of product, ingredient statement, precautionary statements, and signal word. Contact us for a replacement label. Do not store, use, pour or spill near heat or open flame.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions.
