

Hazards to Humans and Domestic Animals
Caution

May cause skin irritation

Avoid contact with skin, eyes or clothing. If contact with eyes occurs, flush with plenty of water.

Do not contaminate irrigation ditches or water used for domestic purposes. Flush sprayer out on suitable non-crop area after use. **Do not** use the same spray equipment for applying other materials to plants as injury will result. This product is toxic to fish. Keep out of lakes, streams or ponds. **Do not** contaminate water by cleaning of equipment or disposal of wastes. Use care to avoid spray contact with drift to 2,4-D susceptible plants such as cotton, tomatoes, flowers, grapes, fruit trees and ornamentals. Trace amounts of spray drift may cause severe injury to both growing and dormant plants. Coarse sprays are less likely to drift. Spray only on calm days using low pressure and lowered booms. Vapors from this product may injure 2,4-D sensitive plants in the vicinity.

Read entire label before using this product

General Information

Crop Rider 6D-DS Weed Killer is an oil soluble formulator which will mix readily with diesel oil for use in backpack sprayers for use in weed and woody plant control. This product is **not** designed for use in water.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Preparation of the Spray: Fill the spray tank with half the required amount of diesel oil, fuel oil or kerosene, then add the recommended amount of **Crop Rider 80-05** with agitation and continue filling the spray tank with oil or kerosene.

Time of Application: Best results are obtained when **Crop Rider 60-08** is used on weeds that are young and in a rapidly growing condition. Applications of lower rates to susceptible annual weeds usually will be satisfactory. But for perennial weeds and other conditions where kill is difficult, use higher rates. When used as a selective spray on crops, the stage of growth of the crop must be considered. Some woody plants and weeds are hard to kill and repeat applications may be necessary.

Small Grain Crops (Wheat, Barley, Rye) Apply Crop Rider 6D-OS at the rate of 1 pint per acre in sufficient oil for uniform coverage on small grains when fully tilled or stooled 4 to 8 inches tall, but before head emerges from the boot. **Do not** use on grains undersown with legumes such as alfalfa or clovers except where some legume injury can be tolerated. **Do not** apply when grains are headed. For airplane application apply 1 to 2 gallons of oil and 2.4 D spray per acre. **Note:** Regulations governing airplane applications of herbicides are in effect in many states. Consult local regulatory agency concerning requirements. **Do not** forage or graze treated grain fields within 2 weeks after treatment with 2.4 D.

For Summer Fallow and Non-Crop Areas. Apply Crop Rider 6D-OS at the rate of 2 to 3 lbs per acre in sufficient oil for uniform coverage when weeds are actively growing. **Do not** apply for control of weeds after treatment if the chemical has disappeared from the soil.

[illegible]

Storage and Disposal

Storage Do not store in contact with water. Do not store in contact with acids. Do not store in contact with alkalis. Do not store in contact with organic solvents. Do not store in contact with oxidizing agents.

Disposal - Do not throw empty "Aqua-Fix" containers into a "Safe" trash can. If used in the daily trash, it will be placed in the "Safe" and then the applicator and pesticides will be placed in a safe container away from water supplies. To ensure a dangerous contact is not made, the disposal is approved to the safety of a safe place (open dumpsites prohibited).
