

Precautionary Statements
Hazards to Humans and Domestic Animals
Caution

Harmful if swallowed.
 Avoid breathing vapors or spray mist.
 Avoid contact with skin, eyes, or clothing. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if contact persists.

Environmental Hazards

Do not contaminate irrigation water used for domestic purposes. This product is toxic to fish. **Keep out of lakes, streams, or ponds.** Use care to avoid spray contact or drift to 2,4-D susceptible plants such as cotton, tomatoes, flowers, grapes, fruit trees, and ornamentals. **Do not** permit spray or drift of BP Le-Vol 4D to drift onto them. Sprayer very sensitive quantities of the spray, which may be visible, can cause severe injury during both growing and dormant periods. **Do not** spray when the wind is blowing towards susceptible crops or ornamental plants. Use coarse sprays to minimize drift. With ground equipment, spray drift can be lessened by keeping the spray boom as low as possible by applying 20 pounds or more of spray per acre by using nozzles that produce a coarse spray pattern. When using aircraft, use fan nozzle tips, by spraying when wind velocity is less than 7 miles per hour, and by stopping all spraying when wind exceeds 7 miles per hour. **Do not** apply with nozzles that produce insecticide or other nozzles that produce a fine droplet spray. With aircraft application, drift can be lessened by applying not less than 20 pounds of spray per acre by using no more than 20 pounds of spray pressure at the nozzles. By using nozzles which produce a coarse spray pattern, and by spraying only when the wind velocity is less than 7 miles per hour. Although this product is much less volatile than butyl or isopropyl esters, at high temperatures, above 80°F, vapors from this product may injure susceptible plants growing nearby. **Do not** use in a green house. **Do not** use in a greenhouse. **Do not** use in a greenhouse. **Do not** use the same spray equipment for application of other materials to 2,4-D susceptible crops as may result.
