GENERAL INFORMATION

LINE RIDER LV 3D/3T BRUSH KILLER is an emulsifiable formulation which forms a stable spray when mixed with water, ready to use with water free diesel oil, fuel oil or kerosene. DO NOT use around the home or in other residential areas.

DIRECTIONS FOR USE

PREPARATION OF THE SPRAY: For the spray tank with the required amount of water, add the recommended amount of fuel oil or kerosene, add the recommended amount of LINE RIDER LV 3D/3T with agitation. Add water to the spray tank with the water agitator until the mixture is uniform. Do not let water get into the LINE RIDER LV 3D/3T container in the finished product.

LINE RIDER LV 3D/3T BRUSH KILLER is designed for use in control of brush and woody plants. Its primary use is on range and pasture lands where brush and woody plants are a problem. Apply LINE RIDER LV 3D/3T after foliage is well developed using a drenching spray containing 2 to 2.2 3 quarts in 100 gallons of water. Coverage should be complete, wetting all parts of the plants including leaves and stems to the point of run off. The best time for spraying is when soil moisture levels are favorable for growth. DO NOT treat during periods of severe drought or in early fall when leaves have lost their healthy green color.

FOLIAGE TREATMENT: Foliage or cut stem sprays are used during the growing season on dense brush or where the growth such as ~~oaks, pines, and other common woody plants~~ is a problem. Apply LINE RIDER LV 3D/3T after foliage is well developed using a drenching spray containing 2 to 2.2 3 quarts in 100 gallons of water. Coverage should be complete, wetting all parts of the plants including leaves and stems to the point of run off. The best time for spraying is when soil moisture levels are favorable for growth. DO NOT treat during periods of severe drought or in early fall when leaves have lost their healthy green color.

BASAL BARK TREATMENT: ~~Brush and woody plants can be controlled any time of the year by spraying the basal part of stems and tree trunks less than 6 inches in diameter from the ground line up to 12 to 16 inches in height. Apply a solution of 2.2 3 quarts of LINE RIDER LV 3D/3T in 97 1 3 gallons, 2 1 5 quarts in 25 gallons, or 3 4 pint in 3 gallons of diesel oil, fuel oil or kerosene, completely wetting the indicated area until run off is noticed at the ground line. Frequently a delayed response and killing can be expected.~~

STUMP TREATMENT: In areas where brush and trees have been cut, stumps and stubs should be treated to prevent regrowth. Apply LINE RIDER LV 3D/3T at the rate of 2.2 3 gallons in 97 1 3 gallons, 2 1 5 quarts in 25 gallons, or 3 4 pint in 3 gallons of fuel oil, diesel oil or kerosene. Wet thoroughly all exposed areas such as cut surface, surface rough and body of stump to ground line. Apply anytime including winter, preferably to freshly cut stumps.

AIRPLANE APPLICATION: For control of moderate to dense stands of brush, ~~but not oak~~, ~~North~~ red and Northern ~~oaks~~, ~~and~~ ~~plants~~, apply 1 to 2 quarts

of LINE RIDER LV 3D/3T per acre. To do this, use 1 to 4 gallons of water and 1 gallon of diesel oil or a mixture of 2 to 5 gallons of diesel oil to avoid ~~the~~ ~~to~~ ~~render~~ ~~the~~ ~~growth~~ ~~spray~~ ~~center~~ ~~stands~~ ~~immediately~~ ~~after~~ ~~brush~~ ~~growth~~ ~~is~~ ~~completed~~.

NOTE: Regulatory government and other applications of herbicides are in effect in many states. Consult local regulatory agencies concerning regulations.

CAUTION

Harmful if swallowed

May cause skin irritation

Avoid contact with eyes, skin and clothing. If contact with eyes occurs, flush with plenty of water.

DO NOT store near fertilizers, seeds, insecticides or fungicides.

DO NOT contaminate irrigation ditches or water used for domestic purposes.

Use care to avoid spray drift to 2,4-D and 2,4,5-T susceptible plants such as cotton, tomatoes, flowers, grapes, fruit trees and ornamentals. Trace amounts of spray drift may cause severe injury to both growing and dormant plants. Coarse sprays are less likely to drift. Spray only on calm days using low pressure and lowered boom. Although this ester is much less volatile than butyl or n-propyl esters, high temperatures may produce vapors after application which might injure 2,4-D and 2,4,5-T sensitive plants in the vicinity.

Flush sprayer out on suitable non-crop area after use. DO NOT use the same spray equipment for applying other materials to plants as injury will result.

DO NOT graze dairy animals on treated areas within 6 weeks after application. DO NOT graze meat animals on treated areas within 2 weeks of slaughter.

DO NOT reuse empty container. Return to drum recycler or destroy by perforating, crushing and burying or discarding in a safe place.

This product is toxic to fish. Keep out of lakes, streams or ponds. DO NOT contaminate water by cleaning of equipment or disposal of wastes. Apply only as directed on this label.

WARRANTY AND LIMITATION OF DAMAGES

SELLER warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and BUYER assumes the risk of any use contrary to such directions. SELLER makes no other express or implied warranty, including any other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of SELLER is authorized to do so except in writing with a specific reference to this warranty. In no event shall SELLER's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

**READ ENTIRE LABEL  
BEFORE USING THIS PRODUCT**

## GENERAL INFORMATION

LINE RIDER LV 3D/3T BRUSH KILLER is an emulsifiable formulation which forms an emulsion in water and will mix readily with water-free diesel oil, fuel oil or kerosene.

DO NOT use around the home, recreation areas or similar sites.

## DIRECTIONS FOR USE

**PREPARATION OF THE SPRAY:** Fill the spray tank with half the required amount of water or water-free diesel oil, fuel oil or kerosene, add the recommended amount of LINE RIDER LV 3D/3T with agitation and continue filling the spray tank with water or petroleum oil. In straight oil mixtures, do not let water get into the LINE RIDER LV 3D/3T itself or into the finished product.

LINE RIDER LV 3D/3T BRUSH KILLER is designed for use in control of brush and woody plants. Its principal use is on rangeland clearance, power lines, rights-of-way, stump land and certain waste areas where it is desired to kill or repress growth of woody plants. This product is not intended for weed control in growing crops.

**FOLIAGE TREATMENT:** Foliage or leaf stem sprays are used during the growing season on dense brush or where vine growth such as Smilax, greenbrier and other common woody vines is a problem. Apply LINE RIDER LV 3D/3T after foliage is well developed, using a drenching spray containing 2 to 2-2/3 quarts in 100 gallons of water. Coverage should be complete, wetting all parts of the plants, including leaves and stems, to the point of run-off. The best time for spraying is when soil moisture levels are favorable for growth. DO NOT treat during periods of severe drought or in early fall when leaves have lost their healthy green color.

**BASAL BARK TREATMENT:** Brush and small trees can be controlled any time of the year by spraying the basal parts of stems and tree trunks less than 6 inches in diameter from the ground line up to 12 to 16 inches in height. Apply a solution of 2-2/3 gallons of LINE RIDER LV 3D/3T in 97-1/3 gallons (2-1/5 quarts in 25 gallons, or 3/4 pint in 3 gallons) of diesel oil, fuel oil or kerosene, completely wetting the indicated area until run-off is noticed at the ground line. Frequently a delayed response and killing can be expected.

**STUMP TREATMENT:** In areas where brush and trees have been cut, all stumps and stubs should be treated to prevent regrowth. Apply LINE RIDER LV 3D/3T at the rate of 2-2/3 gallons in 97-1/3 gallons (2-1/5 quarts in 25 gallons, or 3/4 pint in 3 gallons) of fuel oil, diesel oil or kerosene. Wet thoroughly all exposed areas such as cut surfaces, surface roots and body of stump to ground line. Apply anytime, including winter, preferably to freshly-cut stumps.

**AIRPLANE APPLICATION:** For control of moderate to dense stands of alder, bur, post, blackjack, Northern red and Northern pin oaks in conifer plantings, apply 1 to 2 quarts
