Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CONIFERS: Rhizosphaera needlecast (spruces) and Swiss needlecast (Douglas-fir) - Apply 5½ to 6 lbs. DACONIL 2787 Fungicide per 100 gallons of spray. Make the first application in the spring when new shoot growth is ¼ to 2 inches in length. Make additional applications at 3 to 4 week intervals. Sirococcus tip blight - Apply 2 to 3½ lbs. DACONIL 2787 Fungicide per 100 gallons of spray. Make first application to newly emerging shoots in the spring, followed by additional sprays at 3 to 4 week intervals until needles are fully developed.

NOTE: It is important to read and observe the precautionary statements and all other information appearing on the DACONIL 2787 Fungicide label. Use only as directed.

NOTE: This labeling must be in the possession of the user at the time of pesticide application.
