

**Precautionary Statements
Hazards to Humans and Domestic Animals
Caution**

Harmful if swallowed
May cause skin irritation
Avoid contact with skin, eyes or clothing
Avoid breathing dust

Environmental Hazards

Do not contaminate irrigation ditches or water used for irrigation or domestic purposes. Use care to avoid drift to 2,4-D susceptible plants such as cotton, tomatoes, flowers, grapes, fruit trees and ornamentals. Trace amounts may cause severe injury to both growing and dormant plants. Apply only on calm days to prevent drift. Although this ester is much less volatile than butyl or isopropyl esters, high temperatures may produce vapors after application which may injure 2,4-D sensitive plants in the vicinity. Clean applicator out thoroughly after use. **Do not** use same equipment for applying other materials to plants, as injury will result.

2,4-D 20% Terra G

Read entire label before using this product

General Information

2,4-D 20% Terra G is specifically formulated as a dry, free-flowing granule using a low-volatile ester of 2,4-D as the active ingredient.

2,4-D 20% Terra G is recommended for the control of certain broadleaved weeds such as dandelion, lambsquarters, plantain, chickweed and certain other broadleaved weeds infesting grasses, home lawns, parkways and similar ornamental turfgrass areas. **2,4-D 20% Terra G** is also recommended for weed control of certain broadleaved weeds and some annual grasses when applied preemergent to corn as directed.

Note: Local conditions and application regulations vary and may affect the use of this herbicide. Consult local agricultural experiment station or extension service, weed specialists and state regulatory agencies for recommendations in your area.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Lawns: For best results in the control of broadleaved weeds in well-established lawns, use **2,4-D 20% Terra G** when the weeds are young and actively growing. Apply **2,4-D 20% Terra G** at the rate of 1 pound to 4,000 square feet (40 x 100) using a conventional spreader adjusted to a low setting. For uniform coverage, several passes may be necessary to empty the hopper over the measured area. Subsequent adjustments can be used to accurately calibrate the spreader to deliver the required amount of **2,4-D 20% Terra G**. **Do not** apply closer than 3 feet to ornamental plantings such as shrubs or flowers. **Do not** apply to newly-seeded lawns until grasses become well established. Injury may result if applied to bentgrass, St. Augustinegrass, carpetgrass, centipede grass, Dichondra and clovers.

Corn: (For corn-growing areas of the Midwest only) **2,4-D 20% Terra G** is recommended for preemergent application to corn for control of lambsquarters, pigweed, ragweed and many other broadleaved weeds in corn. Apply the granules as a broadcast or band treatment soon after planting, but before the corn emerges. For best results, delay cultivation as long as possible after application. **Do not** use on light, sandy soils.

Broadcast Treatment: Apply at the rate of 10 pounds per acre as a broadcast treatment, uniformly distributing the granules over the field.

Band Treatment: Apply to corn as a band centered over the corn rows. Where the corn rows are spaced 40 inches apart, use the following amount:

Width of Band in Inches	Amount to Use per Field Acre
10	2.5 pounds
12	3.0 pounds
14	3.5 pounds

Storage and Disposal

Storage—Do not contaminate water, food or feed by storage or disposal. **Do not** store near fertilizers, seeds, insecticides or fungicides.

Disposal—Do not reuse empty container. Pesticide that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Dispose of in an incinerator or landfill approved for pesticide containers, or bury in a safe place. Open dumping is prohibited.

Do not burn.

Consult federal, state or local disposal authorities for approved alternative procedures.

Warranty and Limitation of Damages

Seller warrants that this material conforms to its chemical description and is reasonably fit for purposes stated on the label when used in accordance with directions under normal conditions of use and **Buyer** assumes the risk of any use contrary to such directions. **Seller** makes no other express or implied warranty including any other express or implied warranty of **Fitness** or of **Merchantability**, and no agent of **Seller** is authorized to do so except in writing with a specific reference to this warranty. In no event shall **Seller's** liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.
