EctrinTM Insecticide Horse Neck Band

NOW, you can control horn flies and face flies on your horse without wipes or sprays, without mixing or measuring. The Insecticidal Neck Band controls horn flies and face flies without time-consuming daily applications of fly repellent. This neck band is the newest and easiest way to relieve your horses's problem -- as you free yourself from the daily chore of applying fly spray directly to your horse.

FOR YOUR HORSE'S SAFETY, the Neck Band utilizes a breakaway buckle so whether the horse is stalled, in a paddock, or on pasture there is the assurance that if the neck band becomes snagged it will automatically release with the tension of the horse pulling.

DIRECTIONS FOR USE

General Classification

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For control of horn flies, face flies, and as an aid in the control of house flies and stable flies the Neck Band should be placed on your horse when pests first appear in spring. Bands may remain effective up to 4-5 months. Place neck band around horse's throat and latch band with ends meeting under the jaw. Make sure fit is snug so that neck band does not slide down neck. Cut off excess strap extending more than one inch beyond buckle. When effectiveness diminishes, replace neck band with a new one.

PRECAUTIONARY STATEMENT
HAZARDS TO HUMANS

CAUTION

Wash thoroughly with soap and water after handling and before eating or smoking. Avoid contamination of feed and food stuffs.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by disposal of used band. Use this product only as specified on this label.

STORAGE AND DISPOSAL

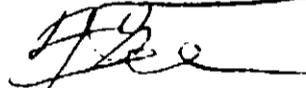

Store in a cool place. Wrap removed bands and put in trash collection.
