PARATHION - 25W

ACTIVE INGREDIENTS:
Parathion (O, O-diethyl O-p-nitrophenyl thiophosphate) 25%

INERT INGREDIENTS 75%

100%

NOT FOR HOME USE

USE ONLY WHEN WEARING THE FOLLOWING PROTECTIVE EQUIPMENT AND CLOTHING
(1) Wear waterproof pants, coat, hat, rubber boots or rubber overshoes.
(2) Wear safety goggles.
(3) Wear mask or respirator approved by the U.S. Bureau of Mines for parathion protection.
(4) Wear heavy duty, natural rubber gloves.

WORK SAFETY RULES

Keep all unprotected persons and children away from treated area or where there is danger of drift.

Do not rub eyes or mouth with hands. If you feel sick in any way, STOP work and get help right away. Call a doctor (physician), clinic, or hospital—immediately. Explain that the victim has been exposed to parathion and describe his condition. After first aid is given (see First Aid Treatment Section) and if a doctor cannot come, take victim to clinic or hospital.

IMPORTANT: Before removing gloves, wash them with soap and water. Always wash hands, face and arms with soap and water before smoking, eating or drinking.

AFTER WORK: Take off all work clothes and shoes.
Parathion is a very dangerous poison. It rapidly enters the body on contact with skin, eyes, and mouth. Clothing wet with this material must be removed immediately. Exposed persons must receive prompt medical treatment or they may die.

Some of the signs and symptoms of poisoning are:
- Headache
- Nausea
- Vomiting
- Trembling
- Weakness
- Blurred vision
- Painful pupils
- Tightness in chest
- Labored breathing
- Numbness
- Sweating
- Swelling
- Drooling
- Trembling of muscles
- Muscular weakness
- Convulsions
- Coma

Call a doctor (physician), clinic or hospital immediately. Explain that the victim has been exposed to parathion and describe his condition.

If breathing has stopped, start artificial respiration immediately and maintain until doctor arrives. If unawake and victim is awake (conscious) make him vomit quickly. Induce vomiting by sticking finger up the throat or by giving soap or syrup or strong coffee to drink. Repeat until vomit is clear. Never give anything by mouth to an unconscious person. Have victim lie down and keep quiet. See doctor immediately.

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. See doctor immediately.

NOTE TO PHYSICIAN
Antidote—administer atropine sulfate in large doses. TWO to FOUR mg intravenously or intramuscularly as soon as symptoms appear. Repeat at 5 to 10 minute intervals until signs of atropine appear. 2-PAM chloride is also antidoted and may be administered in conjunction with atropine. DO NOT GIVE MORPHINE OR TRANQUILIZERS. Parathion is a strong cholinesterase inhibitor affecting the central and peripheral nervous systems and producing cardiac and respiratory depression. If first aid is not forthcoming, the patient should be given supplemental oxygen and treated symptomatically. Continued absorption of the poison may occur and fatal relapses have been reported after initial improvement. VERY CLOSE SUPERVISION OF THE PATIENT IS INDICATED FOR AT LEAST 48 HOURS.

POST TREATED AREA
Consult your State Agricultural Extension Service or Experiment Station regarding pesting treated areas.

CONTAINER DISPOSAL
See attached booklet for proper disposal.

CROP USE DIRECTIONS
Use only according to attached label instructions.

CROP KING CHEMICAL

IMPORTANT NOTICE TO PURCHASER AND USER OF THIS PRODUCT — This product is manufactured, labeled and sold in accordance with state and federal laws. Adequate directions for use, necessary warnings and cautions, and other essential information on the safe handling and use of this product are set forth on this label. However, the use and handling of this product is always attended with risk of personal injury or property damage if the user or handler departs from any degree of the instructions on this label. The manufacturer makes no warranties, either express or implied, and assumes no responsibility whatsoever for the effectiveness or safety of this product except to the extent that the product is used and handled in strict accordance with this information and directions set forth on this label. The foregoing limitation of responsibility may not be altered in any way except by written agreement signed by officers of the manufacturer. Unless the intended purchaser agrees to be bound by the terms and limitations expressed herein and on this label, the manufacturer refuses to consummate the sale of this product to him and the product must be returned to the manufacturer.

CROP KING CHEMICAL
YAKIMA, WASHINGTON 98907
CROP USE DIRECTIONS

APPLES, Cauding Meat, Oriental fruit moth, plum curculio, start applications at petal fall and repeat every 14-16 days until control is achieved. Make no application within 14 days of harvest.

PEACHES: Plum curculio, Oriental fruit moth, San Jose scale.

GRAPES: Muscadine and leafrollers — use 2 lbs. per acre. Mites — 2 to 3 lbs. per acre. All applications on 7 to 10 days to control. Last application 14 days prior to harvest.

DO NOT USE near residential areas. Avoid drift to adjoining food and forage crops about to be harvested, or crops in bloom.

This product is highly toxic to bees and other insects and may harm beneficial insects. Use in accordance with the directions on the product label. Consult your Cooperative Agricultural Extension Service, local beekeepers, and county agricultural extension service authorities for information concerning local conditions. DO NOT STORE WITH FOODSTUFFS. Read Entire Label. Use Strictly in Accordance with Label Cautions, Warnings and Directions. DO NOT APPLY TO ANY AREA NOT SPECIFIED ON LABEL. Avoid drift to adjoining food and forage crops about to be harvested, or crops in bloom. 

DO NOT APPLY during bloom when honey bees or other pollinators are active. Avoid drift to adjoining food and forage crops about to be harvested, or crops in bloom.
