

# Royal 98 Oil

**RECOMMENDATIONS:** For Apples, Pears and Stone Fruits — Dormant and delayed Dormant (before buds open) — for control of Pear Psylla, mites and aphids, use 2 gallons to each 100 gallons of spray when using 300 to 600 gallons per acre. Gallonage per acre should be sufficient to wet trees completely and thoroughly to contact eggs and insects protected by bark.

98 Oil is effective against scale insects during period when young insects are moving.

For recommendations as to compatibility with other materials and timing of applications, consult your local State Agricultural Extension Service.

## CAUTION

Oil followed by cool, damp weather causes injury. Broken emulsions may cause injury. Delayed applications of Oil or Oil-lime sulphur may cause injury when applied in cool weather, particularly to winter injured or weakened trees. Oil applied following some chlorinated hydrocarbon sprays within two weeks may cause injury.

Do not reuse container. Return to drum reconditioner, or destroy by perforating or crushing and bury in a safe place.

EPA Reg. No. 682-68

## CAUTION

Harmful if swallowed.

Avoid inhalation of spray mist.

(See right hand panel for further cautions).
