 CAUTION

SUGGESTIONS — AGRICULTURAL USES

ALFALFA: For control of Alfalfa caterpillars, Alfalfa weevils (larvae), Fall armyworms, Leafhoppers and ~~Japanese beetles~~ — use from 4 to 5 qts. per acre. Use sufficient water to obtain thorough coverage. Last application no closer than 7 days before harvest.

ASPARAGUS: For control of Asparagus beetle and Elm-beetles — use 6 qts. per acre in sufficient water for thorough coverage. Last application at this rate no closer than 7 days before harvest. Minimum suggested rate is 50 gallons of water per acre. If infestation, age of planting warrants a lower rate, use 3 qts. per acre. Last application no closer to harvest than 3 days, unless crop is washed and/or blanched.

BEANS: For control of Bean leaf beetles, Corn earworms, Potato leafhoppers, and Mexican bean beetles — use 3 qts. per acre. Last application no closer to harvest than 3 days.

BEETS: For control of Leaf hoppers, Fall armyworms and Blister beetles — use 5 qts. per acre in a minimum of 50 gallons of water in ground equipment. If foliage density and insect infestation are acute, increase amount of water for better distribution. Last application 14 days before harvest if tops are to be used as feed or forage.

CORN: For control of Fall armyworms — use 3 qts. per acre in sufficient water for thorough coverage. Last application no closer than 7 days before harvest.

ORNAMENTALS: Such as Lilac, Rose, Beauty Bush, Trumpet vine, shade trees such as Maple, Birch, Willow and border plants such as Tulip, Hyacinth, Zinnia, Marigold — for control of Leaf hoppers and Japanese beetles — use 1 to 2 qts. per 100 gallons of water depending on the degree of infestation.

ACTIVE INGREDIENTS: Methoxychlor Technical*

INERT INGREDIENTS

*2,2-bis(p-methoxyphenyl)-1,1,1-trichloroethane

KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin. In case of skin contact, wash with soap and water. Do not breathe spray mist. Harmful if swallowed.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not allow drift onto adjoining areas. Do not contaminate water by cleaning of equipment, or disposal of wastes. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. This product is toxic to bees and should not be applied when they are actively visiting the area. Apply this product only as specified on this label.

Avoid contamination of feed and feedstuffs. Do not store with feed. Do not store with feed or forage to be fed to dairy animals or to animals being finished for slaughter. Do not reuse container. Destroy when empty.

The Federal Food and Drug Administration has set official tolerances for certain pesticide residues. In order that residues on food and forage crops will not exceed established tolerances use only at recommended rates, and do not apply closer to harvest than specified.

Consult with state and county agricultural authorities for additional information consistent with labeling. Read label directions before using.

SUGGESTIONS — AGRICULTURAL USES

PEAS and BLACK-EYED PEAS: For control of Cucumber beetles, Pea weevils, and Corn earworms — use 5 qts. per acre, in at least 50 gallons of water minimum, per acre. Last application no closer than 7 days before harvest.

TOMATOES: For control of Blister beetles and Fall armyworms — use 5 qts. per acre in a minimum of 50 gallons of water. Last application 7 days prior to harvest.

CAUTION

Mix thoroughly before use or use entire container at one time. Do not combine with colloidal suspensions, wettable powder or emulsifiable concentrates unless previous experience assures compatibility. Store in a cool place. Do not store in direct sunlight. Protect from freezing temperatures.

Do not use, store, pour, spill, or store near heat or open flame.

For airplane application use a minimum of 10 gallons of water and where possible use 20 gallons per acre.
