WEED KILLER

**SOLD BY
PERK PRODUCTS COMPANY
Nashville, Tennessee 37210**

DIRECTIONS FOR APPLICATION

Mix thoroughly one part PERKERSON'S TRI-CHLOR Weed Killer with nine parts water and apply on vegetation using an ordinary sprinkling can. If a pressure sprayer is available, a more concentrated solution can be used to advantage. (One part chemical, four parts water.)

Cover thoroughly the tops of the vegetation and the surface of the ground.

CAUTION: Avoid spray drift to desirable plants. Do not apply during or immediately following rain.

CAUTION: DO NOT apply to areas underlaid with roots of desirable vegetation, or where rain may leach this product to such root zones.

One gallon of PERKERSON'S TRI-CHLOR Weed Killer, diluted as above, will cover 500 to 1000 square feet, depending on density of growth.

CAUTION: Do not contaminate water used for irrigation or domestic purposes.

CAUTION: Keep persons and animals OFF treated areas. Harmful if swallowed. Strong oxidant. This material will cause slight skin irritation on prolonged contact. In case of skin contact, wash at once with water.

WARNING: Contact with combustible material may cause fire. All clothing and vegetation contaminated with chlorate or its solution are DANGEROUSLY FLAMMABLE. Remove clothing and wash thoroughly with water. Do not apply on wooden platforms or close to wooden buildings. Keep away from fire. Store separately from flammable material. Avoid storage near feed and food products. Caution, keep animals off of treated areas. Wash sprinkling can or sprayer after using.

CAUTION: Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.

NOTICE TO BUYER: SELLER makes no warranty of any kind, express or implied concerning the use of this product.
