TO OPERATE

Hold dispenser upright. Point valve opening away from face. Push button to release jet stream. Aim at nests which may be in trees, bushes, under eaves, chimneys, holes in the ground, under rocks.

The jet stream allows you to stand 12 feet or more away from the nest to kill Hornets, Bees, Wasps and Yellow Jackets. The sprayed nests should be rid of these pests within 24 hours after treatment.

RESIDUAL ACTION -- The jet stream spray will leave a residual coating of insecticide that will continue to kill after application. If reinfestation occurs due to migration or removal of insecticide coating by rain or cleaning solution, repeat the treatment.
