WASHINGTON, D.C. 20460

OFFICE OF  
PREVENTION, PESTICIDES  
AND TOXIC SUBSTANCES

June 3, 2010

Ms. Kim Davis  
Claire Manufacturing Company  
c/o RegWest Company LLC  
8203 West 20<sup>th</sup> St., Suite A  
Greeley, CO 80634-4696

Subject: Label Notification(s) for Pesticide Registration Notice 98-10

Dear Ms. Davis:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated May 12, 2010 for the following product(s):

**Claire Fast Kill Residual Roach & Ant Killer EPA Reg. No. 706-108**

The Registration Division (RD) has conducted a review of this request for applicability under PRN 98-10 and finds that the label change(s) requested falls within the scope of PRN 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact Regina Foushee'-Smith at 703-605-0780.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard J. Gebken".

Richard J. Gebken  
Product Manager  
Insecticide Branch  
Registration Division (7505P)

## Submit Non-PRIA Label Revision Notification per PR Notices 2007-4 and 2008-1.

*This notification is consistent with the provisions of PR Notices 2007-4 and 2008-1 and EPA regulations at 40 CFR § 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to the EPA. I further understand that if this notification is not consistent with the terms of PR Notices 2007-4 and 2008-1 and 40 CFR § 152.46 this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.*

## Non-PRIA Label Revision Notification

May 12, 2010

Mr. Richard Gebken, Product Manager 10  
Document Processing Desk – **NOTIF**  
Office of Pesticide Programs – **7504P**  
**U.S. Environmental Protection Agency**  
One Potomac Yard (South Building), Room S-4900  
2777 South Crystal Drive  
Washington, DC 20460

Dear Mr. Gebken:

**Subject:** Claire® Manufacturing Company  
Claire® Fast Kill Residual Roach & Ant Killer  
EPA Reg. No. 706-108

One behalf of **Claire Manufacturing Company**, RegWest Company, LLC is submitting the attached materials as notification of a Non-PRIA label revision for subject product per PR Notices 2007-4 and 2008-1. RegWest will act as sole agent in this endeavor.

Attached are the following:

1. Application for Pesticide: Other (Notification)
2. One *Reference Label* (illustrating the revisions)
3. Two *New Labels* (incorporating the revisions)

In addition to the PR Notices changes, we are deleting "or 1-800-CLEANUP" from the disposal directions and we are deleting the company website from the label. Please refer to the *Reference Label* for an illustration of all revisions.

Please contact me at 970.353.0611 or kim@regwest.com if you have any questions or require additional information.

Regards,  
RegWest Company, LLC

A handwritten signature in black ink, appearing to read "Kim Davis", is written over a circular stamp or seal.

Kim Davis,  
Consultant/Agent

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-228-5635 for emergency medical treatment information.

**Note to Physician:** This product contains petroleum distillate and may pose an aspiration pneumonia hazard.

*{Note: The First Aid statements' grid format will be used if label space allows, otherwise a paragraph format will be used.}*

**PRECAUTIONARY STATEMENTS**  
**Hazards to Humans & Domestic Animals**  
**CAUTION**

Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

**Environmental Hazards**

This product is toxic to fish and other wildlife. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain do not blow or wash pesticide off the treatment area.

**Physical or Chemical Hazards**

Flammable. Contents under pressure. Keep away from heat, spark and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Claire Fast Kill Residual Roach & Ant Killer is intended for use in and around residential structures and their immediate surroundings. Permitted areas of use include apartments, atriums, attics, automobiles, basements, bathrooms, boats, cabins, campers, carports, cat sleeping quarters, clothes storage, condominiums, decks, dens, driveways, garages, gazebos, homes, kitchens, lanais, living rooms, parlors, patios, pet sleeping areas, play rooms, porches, recreational vehicles, rooms, solariums, storage areas, sun rooms, utility rooms and verandahs.

This product may stain or adversely affect vinyl, painted and plastic surfaces. Avoid application to asphalt shingles as staining may occur. Before using in areas where spray may contact these surfaces, test in an inconspicuous area and recheck in a few hours.

Do not allow children or pets to contact treated surfaces until dry. Do not apply in classrooms when in use. Do not apply this product in occupied patient rooms or in any rooms/areas while occupied with patients, the elderly or infirm. Do not apply to institutions (including libraries, sports facilities, etc.) in the immediate area when occupants are present.

**For Crack and Crevice Treatment:** Apply insecticide directly into cracks and crevices or voids using the injection tube. Place injector tip ½ inch into cracks and crevices, holes and other small openings. Release approximately one-second spray per spot. In long running cracks, move injector tip along the crack while spraying at the rate of three linear feet per second. For inaccessible closed voids calculate the voids cubic area and treat at rate of five to ten seconds per cubic feet. Several holes may be required in long-running voids.

**Crawling Insects:** Ants, Booklice, Boxelder Bugs, Cockroaches (including adult and immature stages of both non-resistant and organophosphate- and carbamate-resistant strains), Centipedes, Crickets, Dermestids, Firebrats, Fleas, Palmetto Bugs, Silverfish, Spiders, Ticks, Earwigs, Sowbugs, Scorpion and Waterbugs. Inject into cracks and crevices and void spaces where insects may be harboring. These may include openings around pipes and sinks, under refrigerators, behind baseboards, washing machines, stoves, cabinets, meter boxes and manholes.

**Bedlice and Silverfish:** Inject into cracks and crevices associated with baseboards, doorframes, bookcases and other harborage sites.

**Ants:** Inject into cracks and crevice and voids where ants may be traveling and/or harboring, including around doors, window frame, behind electrical switches and outlets and other structural cracks and crevices.

**Stored Product Pests:** Inject cracks and crevices and/or voids where these insects may be harboring or hibernating. Infested areas include cracks and crevices in cabinets and pantries, wall voids, and around window and doorframes, under siding and in machinery.

**Localized Treatment of Wood-infesting Insects:** Beetles† and Borers† (such as the following families: Anobiidae†, Bostrichidae†, Buprestidae†, Cerambycidae†, Lyctidae†, Oedemeridae†, Sesiidae†), Carpenter Ants, Carpenter Bees, Termites, and Wood Wasps. Locate suspected infestation and/or insect tunnels and cavities. Inject 5 to 10 seconds of spray into insect tunnels, gallery and inaccessible closed voids. In infested sites, pilot holes should be drilled eight to ten inches apart to ensure thorough insecticide gallery treatment. Make sure not to contact electrical wiring, plumbing, etc. when drilling. For Carpenter Bees, seal entrance openings with small pieces of stainless steel wool after application.

†Not registered for control in California.

\*\*The purpose of such applications of Claire Fast Kill Residual Roach & Ant Killer for termites is to kill workers or winged reproductive forms, which may be present in treated channels at the time of treatment. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement. This product is not recommended as sole protection against termites. For active infestations, get a professional inspection.

**Applications in Food Handling Establishments:** Places other than private residences in which food is held, processed, prepared or served. Do not apply directly to food. Do not apply when food-processing facility is in operation or food is exposed. Do not apply this product to surfaces or utensils that may come in contact with food. Cover or remove all food and food processing equipment during application. Food contact surfaces and equipment must be thoroughly cleaned with an effective cleaning compound and rinsed with potable water before using. Do not spray plants to be used for food or feed.

**Food Areas:** Includes areas for receiving, storage, packing (canning, bottling, wrapping, boiling, preparing edible waste storage and enclosed processing systems: mills, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation) also would be considered a food area. Apply prescribed amounts of insecticide directly into cracks and crevices or voids using injection tube in points between different elements of construction, between equipment and door openings, leading to voids and hollow spaces in wells, equipment legs and bases where insects hide. Repeat applications as needed but do not exceed more than one application every seven days in restaurants and similar food service establishments.

**Nonfood Areas:** Includes areas such as garbage rooms, lavatories, floor drains (to sewers), entries, vestibules, offices, locker rooms, machine rooms, broiler rooms, garages, mop closets, and storage (after canning or bottling).

**For Premise Pests:** Application Within Non-Residential Buildings Including Non-Food Areas of Industrial, Institutional and Commercial Buildings, Hotels, Warehouses, Truck Trailers, Theaters, and Office Buildings:

**For General Use (Without Injection Tube):** Apply as a coarse wet spray to thoroughly treat insect hiding places such as cracks, crevices and moist areas around pipes and utility service boxes, under refrigerators and along baseboards to control the insect pests listed below. Spray insects directly, whenever possible. Keep people and domestic animals off treated areas until dry. Do not spray on livestock feed. Do not apply to institutions (including libraries, hospitals, nursing homes, sport facilities, etc.) in the immediate area when occupants are present.

**Fleas and Ticks on Surfaces:** Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are bad. Test first for staining on an inconspicuous place prior to use. Also, treat your yard with a product registered for yard application.

**To Kill Ants, Centipedes, Crickets, Cockroaches, Earwigs, Millipedes, Psocids, Pillbugs, Sowbugs, Spiders and Waterbugs:** Apply to areas where these pests are found or may hide, including dark corners of rooms; storage rooms, and closets, cracks and crevices in floors, walls; and between building construction elements, along baseboards, door and window frames, behind and beneath sinks, stoves, refrigerators and cabinets, and around

garbage cans, bins, and dumpsters, plumbing and other utility service installations. Pests flushed from hiding should be sprayed directly. For Ants, spray ant trails, door thresholds, door and window frames (outdoors and indoors), and wherever these pests may find access into the building should be sprayed.

**Spiders and Waterbugs:** Apply as a coarse wet spray to floors, under sinks, areas behind pipes, utility service boxes, and in all areas where these insects seek harborage. Contact as many insects as possible.

**Pantry Pests:** Grain Beetles (Rusty, Merchant and Saw-toothed), Flour Beetles (Red and Confused), Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Elm Leaf Beetles and Tobacco Moths: Treat exposed stages. Remove all foodstuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food and utensils. Wash any exposed food handling surfaces and utensils before use.

**Carpet Beetles (Black, Furniture, and Varied):** Spray on and under edges of floor coverings, under rugs, and furniture and in closets or other localities where these insects are found.

**Webbing Clothes Moths:** Spray in closets and other storage areas where these pests are found. Do not apply to clothing.

**Ants:** Spray around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris until surface is slightly wet.

**Fire Ants:** To quiet active ants on the surface, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

**For the Control of Garden Insects:** For use on roses, dahlias, asters, and other ornamentals to kill Japanese beetles hit by spray, as well as Whiteflies, Aphids, exposed Thrips, Spiders, Red Mites, Army Worms, and Leaf Miners. Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.

**To Kill Houseflies, Mosquitoes, Gnats and Small Flying Moths:** Close room and turn off air conditioning or ventilating equipment or fans. Direct spray first into all cracks and crevices, behind all equipment, appliances, cupboards, or any dark harborage areas, then treat as a space spray, directing the spray towards the ceiling and upper corners of the room. Keep areas closed for at least ½ hour. Do not remain in treated area after treatment. Ventilate area thoroughly before re-entry. Do not repeat application more than once every three days.

#### Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store in a cool, dry place. Keep container tightly closed. **Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**Container Disposal:** Do Not Puncture or Incinerate! Non-refillable container; do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions.
