7/2

We propose that the following statement in the General Use Restrictions section of the GOAL 1.6E herbicide Directions for Use:

Do not rotate any crops other than cotton, onions, soybeans, or spearmint/peppermint within a 10 month period after treatment.

be revised to read as follows:

Rotation crop restrictions:

- .Do not rotate to small grain crops within 10 months following a GOAL treatment.
- .Do not direct seed any crops, other than GOAL labeled crops, within 60 days following a GOAL treatment.
- .Do not transplant seedling crops, other than GOAL labeled crops, within 30 days following a GOAL treatment.
