

GOAL® 1.6E Herbicide
EPA Reg. No. 707-174

Proposed Labeling
Revised Crop Rotation Restriction
(Revised January 19, 1989)

Jan, 30, 1989
207-174

PHILADELPHIA, PENNSYLVANIA 19103

ROTATION CROP RESTRICTIONS

- Do not rotate to small grain crops (includes barley, buckwheat, corn, proso millet, pearl millet, oats, popcorn, rice, rye, sorghum, triticale, wheat, wild rice) within 10 months following a GOAL treatment.
- Do not direct seed any crops, other than GOAL labeled crops, within 60 days following a GOAL treatment.
- Do not transplant seedling crops, other than GOAL labeled crops, within 30 days following a GOAL treatment.

IMPORTANT: TREATED SOIL MUST BE THOROUGHLY INCORPORATED TO A DEPTH OF 4 INCHES. FAILURE TO ACHIEVE THOROUGH AND COMPLETE INCORPORATION OR TO FOLLOW THE REQUIRED MINIMUM PLANT BACK INTERVAL MAY RESULT IN CROP INJURY, STAND REDUCTION AND/OR VIGOR REDUCTION OF THE PLANT BACK CROP.

See specific fallow bed labeling regarding crop planting information for applications of GOAL 1.6E made to a fallow bed or fallow field.
