

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### FUEL PRESERVATION

Kathon FP Concentrate microbicide is recommended for the control of bacteria and fungi in the following liquid hydrocarbon fuels and oils, crude oils, aviation fuels, kerosene, heating oils, diesel fuels, residual fuel oils, coal slurries, liquefied petroleum gases, and petrochemical feedstocks.

Kathon FP Concentrate is recommended for **REFINERY AND TERMINAL USE ONLY**.

**METHOD OF ADDITION:** Kathon FP Concentrate microbicide should be directly dispensed into a fuel tank, storage tank, or flowing stream of fuel in a manner to ensure uniform distribution of the preservative in the fuel system. Slug dose or continuous feed methods are recommended.

**CURATIVE DOSE:** When the system is noticeably fouled, add 13.27 gallons of Kathon FP Concentrate microbicide per 1 million gallons of fluid in the system. This will provide 13.27 ppm Kathon FP Concentrate and 15.30 ppm active ingredient. Repeat until control is achieved. A shock dose of up to 54 gallons of Kathon FP Concentrate per 1 million gallons of fluid is recommended in the case of extreme contamination. Grossly contaminated systems should be physically cleaned to remove debris.

**MAINTENANCE DOSE:** When the system is not noticeably fouled, add 6.7 to 20 gallons of Kathon FP Concentrate microbicide per 1 million gallons of fluid to maintain the system. This will provide 6.7 to 20 ppm of Kathon FP Concentrate and 0.75-2.25 ppm active ingredient. Repeat every 4-6 weeks or when microbial contamination is detected.

**FOR USE IN AVIATION FUEL, THE FEDERAL AVIATION ADMINISTRATION MUST BE CONSULTED AS TO THE ACCEPTABILITY OF THE ADDITIVE FOR USE IN SPECIFIC ENGINES AND/OR AIRCRAFT.**

Kathon FP Concentrate microbicide weighs 10.4 lbs. per gallon.
