**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**ARCHITECTURAL PAINTS AND COATINGS**

For use as an industrial microbicide in coatings such as latex and solvent-based paints, semi-transparent stains and solid stains. Use 0.08 - 0.37 pound of Kathon 930 Industrial Microbicide per 100 pound of coating formulation. If necessary, a higher dosage up to 0.47 pound of Kathon 930 Industrial Microbicide per 100 pound may be used depending upon level of control required.

In latex coatings, Kathon 930 Industrial Microbicide should be added during the letdown phase of paint manufacture. To insure uniform distribution throughout the coating, it is recommended that Kathon 930 Industrial Microbicide be premixed with propylene glycol and coalescent. The premix should be added slowly, with good agitation, just prior to the addition of the thickener. In solvent-based coatings, a coupling solvent such as butyl Cellosolve® may be used to assist in mixing Kathon 930 Industrial Microbicide.

**CONCENTRATES:**

Kathon 930 Industrial Microbicide should be added to the polymer latex concentrate at a level to ensure that the final use-dilution will contain 0.08 to 0.37 pound of Kathon 930 Industrial Microbicide per 100 pound of coating formulation.

Dosage levels of Kathon 930 Industrial Microbicide will depend upon the type of formulation, the presence and level of zinc oxide in the system, and the climate in which the material will be exposed.

This product may not be used for food grade coatings or adhesives that may come in contact with food.

**BUILDING MATERIALS**

For use as an industrial microbicide in building materials such as elastomeric roof and wall coatings and mastics, caulks, sealants, joint cements, spackling, stucco, grouting and insulation and exterior finish systems. Use 0.08 - 0.37 pound of Kathon 930 Industrial Microbicide per 100 pound of formulation.

**ADHESIVES AND TACKIFIERS**

For use as an industrial microbicide in water soluble and water dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene-butadiene, polyurethane, epoxy, acrylic latices and tackifiers derived from rosin and hydrocarbon resins. Use 0.08 - 0.37 pound of Kathon 930 Industrial Microbicide per 100 pound of coating formulation.

This product may not be used for food grade coatings or adhesives that may come in contact with food.
