RIJ-4996

ATLAS 304

APPLICATIONS:

ALGI-RID NF is used to control the growth of algae in swimming pools. It is most effective for treating pools containing heavy growth of algae. Algae should be removed prior to using ALGI-RID NF.

For pools with a concrete surface, apply 1/2 lb. of initial dose of 50 lb. of ALGI-RID NF per 10,000 gallons of water and re-apply weekly for 4 weeks by filtering.

For treatment of a heavily seeded and tiled pool, add initially 1/2 lb. of 50 lb. of ALGI-RID NF per 10,000 gallons of water.

To maintain low levels of algae regrowth, subsequent additions of 1/4 lb. of 50 lb. of ALGI-RID NF should be made every 5 to 7 days after the initial treatment.

Do not use more than ALGI-RID NF throughout the water in the pool. Use only the amount indicated.

ALGI-RID NF is compatible with other chemicals normally used to treat pools and is effective at both acid and alkaline pH. ALGI-RID NF can be used on pools treated with chlorochemicals which reduce the amount of free chlorine available. However, it is not recommended for use in pools treated with bromine chemicals. For more information, contact your distributor.

ALGI-RID

NF

ACCEPTED
MAY 7 1973
UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTER-
ED UNDER NO. 7138

COMPOSITION:

Active Ingredients:
Poly (oxyethylene dimethylammonium chloride) methylimidazolidine derivatives
Inert ingredient

CAUTION: KEEP OUT OF REACH OF CHILDREN.

See label for additional information.
