DIRECTIONS

FLIES, MOSQUITOES and GNATS - Close doors and windows. Direct the spray up toward the ceiling. The room should be filled with mist and remain closed for 10 - 20 minutes. Sweep up and destroy dead or stupefied insects. Repeat treatment as often as necessary. Spray garbage cans, refuse and manure piles, stagnant water, drains and all other likely breeding places of fly and mosquito eggs and larvae.

SILVERFISH - Spray liberally with force around refrigerators, sinks, cabinets and pantry shelves, into all cracks and crevices, pipe openings in walls and floors or wherever these insects are likely to hide. Repeat as necessary.

ANTS - Use the spray so as to wet as many of the insects as possible paying particular attention to nests and runways. Repeat as necessary.

BED-BUGS - Spray mattresses thoroughly on both sides, especially seams and tufts. Spray springs, slats and all joints and crevices in beds. Also spray room base boards, mouldings and behind loose wallpaper, and any place where bugs may hide. Repeat as often as necessary.

CLOTHES MOTHS and CARPET BEETLES - Take special precaution to see that cracks in floors and openings below base boards are thoroughly wetted with spray. Wool lint and organic matter accumulating in these places ~~will serve as breeding materials for such pests.~~ will serve as breeding materials for such pests. Clothing to be stored should be cleaned, aired and sprayed carefully at a distance of one to two feet, taking care to see that seams and folds are wetted. Chests in which woolens are to be stored should be thoroughly sprayed before being filled with clothes. Closets should be sprayed liberally at least twice a month, directing the spray on the garments. Unless articles are stored in mothproof containers, they should be sprayed every thirty days.

FLEAS - Liberally spray all infested places - rugs, and under rugs, basements, under porches and wherever pet animals make their beds. Spray bedding of household pets. Do not spray directly on animals. Repeat as required.
