RED-I-CAT

KILLS RATS AND MICE

This product is ready to use without further mixing. RED-I-CAT is used for the control of Norway Rats, Roof Rats, and House Mice.

DIRECTIONS: The contents of this container should be placed in shallow bait stations which should be placed close to partitions or walls serving as ways for Rodents: placement of this bait should also be made where rats have been discovered. Bait stations should be examined and bait re-added to its original volume daily. Where a continuous source of infestation is present: e.g., nearby dumps, permanent bait stations should be established and the bait replenished as needed. Four to 16 oz. of RED-I-CAT bait is recommended per bait station for Rats. Tablespoonful amounts (1/2 oz.) of RED-I-CAT bait should be placed at 8 - 10 foot intervals for the control of Mice. Rat baiting should be maintained for 10 days; mouse baiting for 15 days.

CAUTION: KEEP OUT OF REACH OF CHILDREN. Irresponsible persons, pets and domestic animals. Avoid contamination of feed and food crops. Wash hands thoroughly with soap and water after handling. Do not reuse container. Destroy when empty.

Baited baits should be placed in locations not accessible to children, pets, wildlife and domestic animals, or tamper-proof boxes.

Do not contaminate water by cleaning of equipment or disposal of wastes. Keep out of lakes, streams, or ponds. Apply this product only as specified on this label.

Permanent bait stations should be employed. These should be of permanent durable construction providing a method of fastening to flooring or subboards. Lids of these bait stations should be equipped with a locking device, making the station tamper-proof.

Call a physician or local Poison Control Center listed in your telephone directory in case of poisoning.

NOTICE: Buyer assumes all risks of use, storage and handling of this material not in strict accordance with directions given herewith.
