GREEN-DEVIL FLY BAIT

DIRECTIONS FOR USE

Keep container tightly closed when not in use.

Sift or scatter on the ground or floors of areas where flies congregate or breed, such as Dairy and Livestock Barns, Stables and Pens, Feed Rooms, Poultry Houses, Manure Piles, Kennels, Garbage Cans, Garbage Dumps, Certain Commercial Buildings, Porches and other outside areas.

Against Adult (Winged) Flies - Use 3 to 4 Oz. per 100 Sq. Ft. Distribute evenly where flies congregate. Treat the entire area if flies are plentiful.

Against light populations treat in spots or in strips. Repeat as needed.

Against Maggots and Adults. Use 1 to 1½ Lbs. per 100 Sq. Ft. (2 Oz. per Sq. Yd.) Apply to the manure evenly and thoroughly. If in small mounds, or cones, apply from two sides. Repeat after 5 to 7 days, and then as needed.

Dairy Barns - Against Adult Flies, treat the Feed Room Floor and either the Stanchion Floor, or the Feed Cart Aisles at 3 to 4 Oz. per 100 Sq. Ft. Repeat as needed, usually after one to seven days. Do not feed the floor sweepings to livestock.

Poultry on Wire. Against Adult Flies use 3 to 4 Oz. per 100 Sq. Ft. on manure or walkways in and around the buildings, including feed rooms and egg houses. Repeat as needed (every 3 to 10 days). For quicker reduction of fly populations, treat the manure once or twice against maggots at 1½ Lbs. per 100 Sq. Ft. and continue against adults as directed above.

Poultry on Ground or Litter. Apply against adult flies outside the buildings or yards and in places where the poultry cannot feed upon the poison.

Note: The action against adults is longest (several days) when used on dry surfaces and shortest (one day) when used on moist surfaces.

CAUTION

Harmful if swallowed or absorbed thru the skin. Avoid skin contact, use a rubber glove. Wash thoroughly with soap and water after using. Avoid contamination of feed and foodstuffs. Keep out of reach of children, poultry and domestic animals. Do not use inside homes or where milk is stored or processed. Malathion, upon repeated or prolonged careless use may cause cholinesterase inhibition. If accidental poisoning occurs, get prompt medical aid. Atropine is antidotal. Avoid prolonged breathing of dust. Keep young calves and poultry off treated areas.

NON-WARRANTY

Seller makes no warranty of any kind, expressed or implied, concerning this product. Buyer assumes all risk of use or handling, whether in accordance with directions or not.

ACTIVE INGREDIENTS:

Malathion (O, O-Dimethyl Dithiophosphate of Diethylmercaptosuccinate) 1.25%

INERT INGREDIENTS 98.75%
