on side panel)

U.S.D.A. Reg. No. 728-84

NET WEIGHT 5 LBS.

Manufactured by  
**PEARSON & COMPANY**  
Mobile, Alabama

## DIRECTIONS FOR USE

For control of COCKROACHES and WATER-BUGS, place Pearson's Poison Paste two feet apart in cracks and crevices in all dark and likely hiding places. Repeat application three or four times at 5 day intervals. Pick up and discard after control has been accomplished.

For control of MICE and RATS, mix 1 part Pearson's Poison Paste with 4 parts bait (bread crumbs, grated cheese, meat, fish). When mixing baits, do not use foods which will be attractive to children. Mix well and place about 1 tablespoonful of mixed bait in tamper-proof bait boxes. Place baits at 8 to 10 foot intervals where rats and mice feed, water or travel. Dogs and cats will actively seek out meat and fish baits; sufficient protection must be provided. Unopened paste and bait must be picked up and discarded when control of pests has been accomplished.

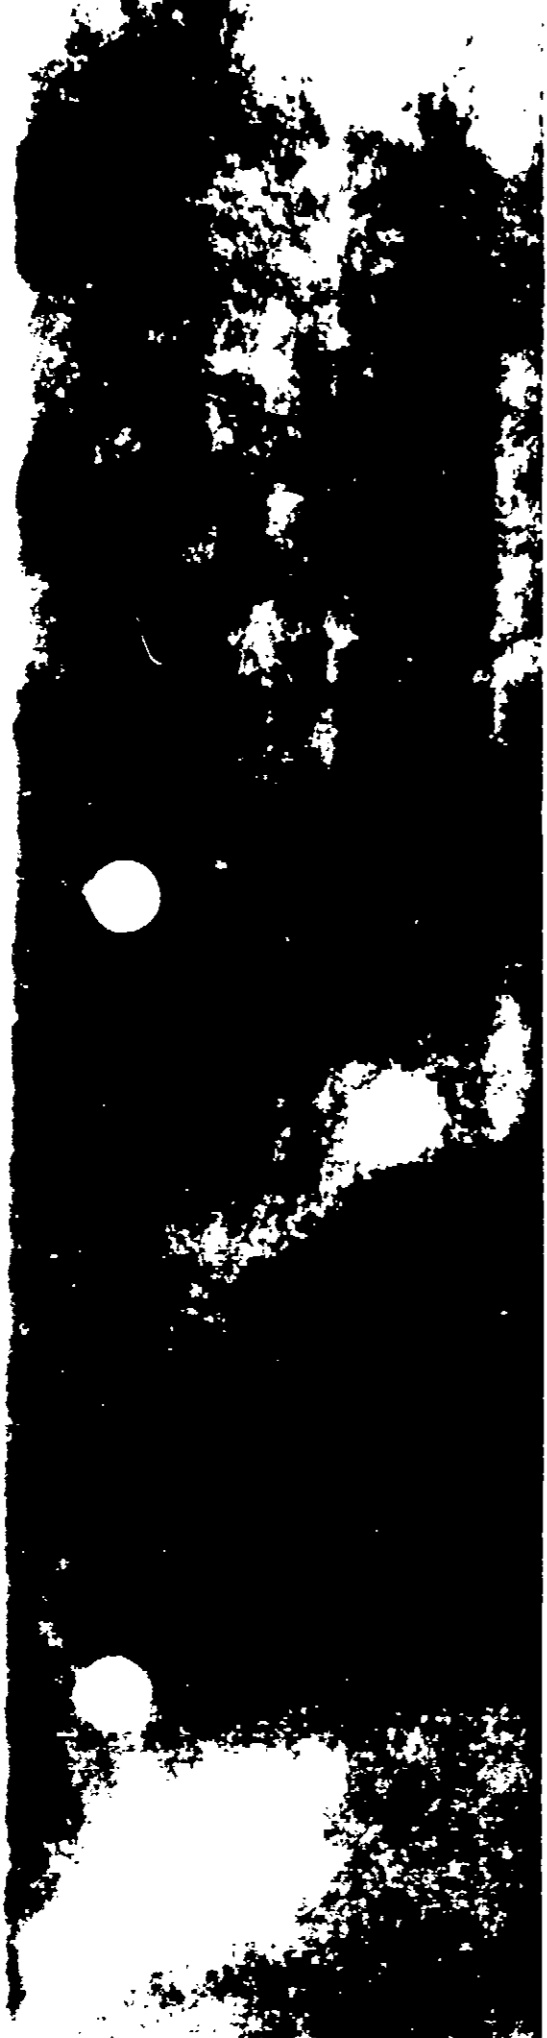

**DANGER:** Keep out of reach of irresponsible persons and domestic animals. May be fatal if swallowed, or if in eyes, on skin or clothing. Do not inhale fumes. Wash hands immediately with soap and water. In case of poisoning, give a glass of warm water, and repeat until fluid is clear. Then follow with 1 quart of medicinal mineral oil (not salicylate table oil). Have patient lie down and keep warm.

POISON

**NOTICE:** Follow directions on label and method of application. Do not mix with other chemicals unless specifically recommended, and other instructions on the use of his product apply. For details of the secret Bayer process, see the storage instructions on the label.
