

Texas Star

SCREWWORM KILLER

REPELLENT — ANTISEPTIC
FOR EXTERNAL USE ONLY
ON **HORSES**

This old reliable remedy has been successfully used in many thousands of screwworm cases. Use full strength, applying in and around wounds and screwworm infestations. Use on medicated dressings for superficial cuts, wounds and abrasions; will also act as a repellent. Repeat application daily or as often as necessary to assure wound coverage with a coat of the medication until wound is healed.

ACTIVE INGREDIENTS:	
PINE TAR	47.50%
BENZENE	47.50%
PINE OIL	5.00%
	<hr/>
	100.00%

CAUTION: Keep out of reach of children.

DANGER — EXTREMELY FLAMMABLE, KEEP AWAY FROM FIRE, SPARKS AND HEATED SURFACES.

Do not apply to humans. Harmful if swallowed. Avoid breathing vapor. Avoid contact with skin, eyes and mucous membranes. If redness or irritation persists, discontinue use and consult a veterinarian. May be absorbed through skin. Avoid contamination of feed and foodstuff. Do not use on horses to be slaughtered for food. Do not use excessively on any wound. In case of deep or puncture wounds, consult a veterinarian. Use caution in treatment of colts by using a minimum of this product. Rinse empty container thoroughly with water and discard it.
