# Pitch Pack Tag M<sup>®</sup>

## Rat and Mouse Bait

### Active Ingredients

Warfarin [3-( $\alpha$ -acetylbenzyl)-4-hydroxycoumarin]	0.025%
N <sup>1</sup> -(2-Quinoxaliny) sulfanilamide [Sulfaquinoxaline]	0.025%
Inert Ingredients	99.950%

**CAUTION:** Keep out of reach of children, pets, wildlife, and domestic animals. Protect children, pets, wildlife, and domestic animals from the bait. If swallowed by humans, domestic animals or pets, call a physician or veterinarian immediately. Pitch Pack Tag M may reduce the clotting ability of the blood and cause internal bleeding. Antidote: Vitamin K.

EPA Reg. No. 734-38    EPA Est. No. 9562-TX-1

**CONTENTS: 50 packets -  
NET WT. 3 OZ. each  
TOTAL NET WT. 9.4 LBS.**

**Pitch Pack Tag M** has been field tested in areas heavily infested with rats. These areas offered liberal selection of foods. The tests have shown:

### Pitch Pack Tag M has

- **Attractiveness** — Pitch Pack Tag M is highly acceptable.
- **Acceptability** — Once rats begin to feed on Pitch Pack Tag M, it will produce a lethal dose.
- **Effectiveness** — Pitch Pack Tag M will kill rats when used as directed.

### DIRECTIONS

PITCH PACK<sup>®</sup> packets of bait are designed to be thrown into hard-to-reach places frequented by rats and mice, and do not have to be opened to be effective.

**Rats:** Place 1 to 2 PITCH PACK<sup>®</sup> packets next to burrows, in runways, or where rats are accustomed to feeding. Check these bait stations daily to assure an uninterrupted supply of Pitch Pack Tag M for a period of not less than 12 days. Continue baiting until all signs of feeding have stopped.

**Mice:** Place 1 ounce of Pitch Pack Tag M in a shallow, dry container next to burrows, in runways, or where mice are accustomed to feeding. It is recommended that Pitch Pack Tag M be placed at intervals of 8 to 12 feet. Check bait stations daily to assure an uninterrupted supply of Pitch Pack Tag M for a period of not less than 15 days.

**Long Term Control:** Bait continuously using Pitch Pack Tag M. Stale, damp or moldy baits should be replaced with fresh bait promptly. Bait should be placed in tamper-proof bait boxes or in areas not accessible to children, pets, wildlife, and domestic animals.

**Note:** Pitch Pack Tag M contains warfarin, an anticoagulant chemical that reduces the clotting ability of the blood. Upon repeated feedings, warfarin causes fatal hemorrhage in rats and mice. Pitch Pack Tag M also contains an antibacterial agent which inhibits the growth of bacteria that produce Vitamin K, an antidote for the effects of warfarin.
